

Document Summarization & Automation Solution

Empower Your Workflow with Cutting-Edge AI Technology

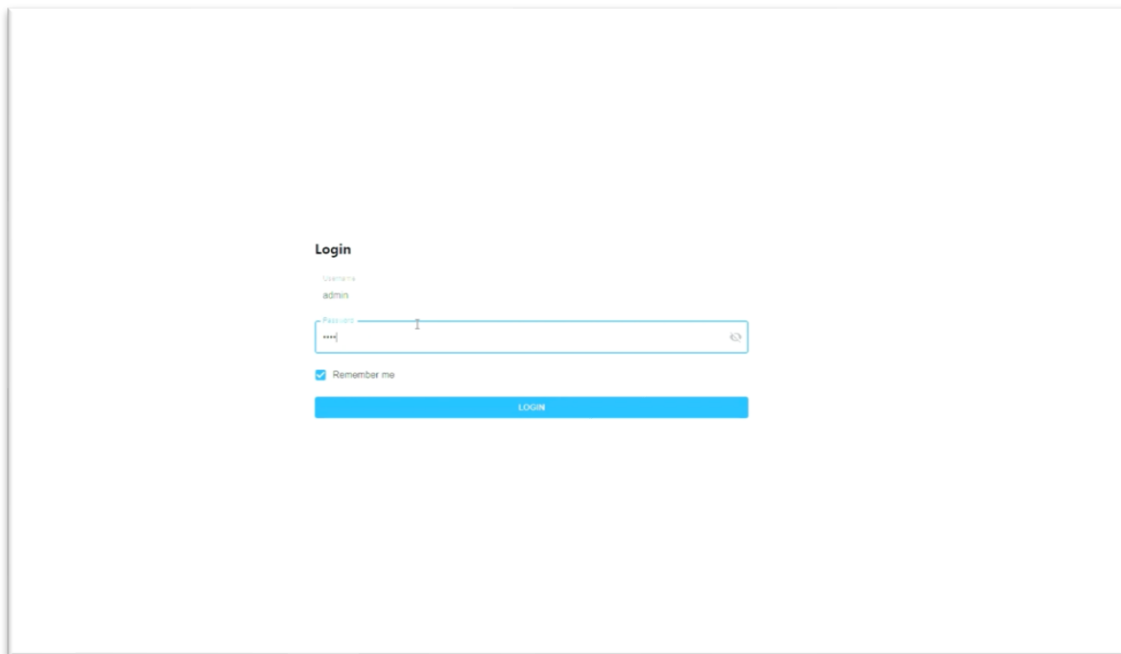

Overview

Capax's Document Summarization & Automation Solution is designed to streamline your document processing tasks with efficiency and precision. From user-friendly login access to multilingual support and comprehensive data handling features, our solution revolutionizes the way you interact with documents.

Key Features

Simple Login Interface:

Access your account effortlessly with a designated user login for seamless navigation.

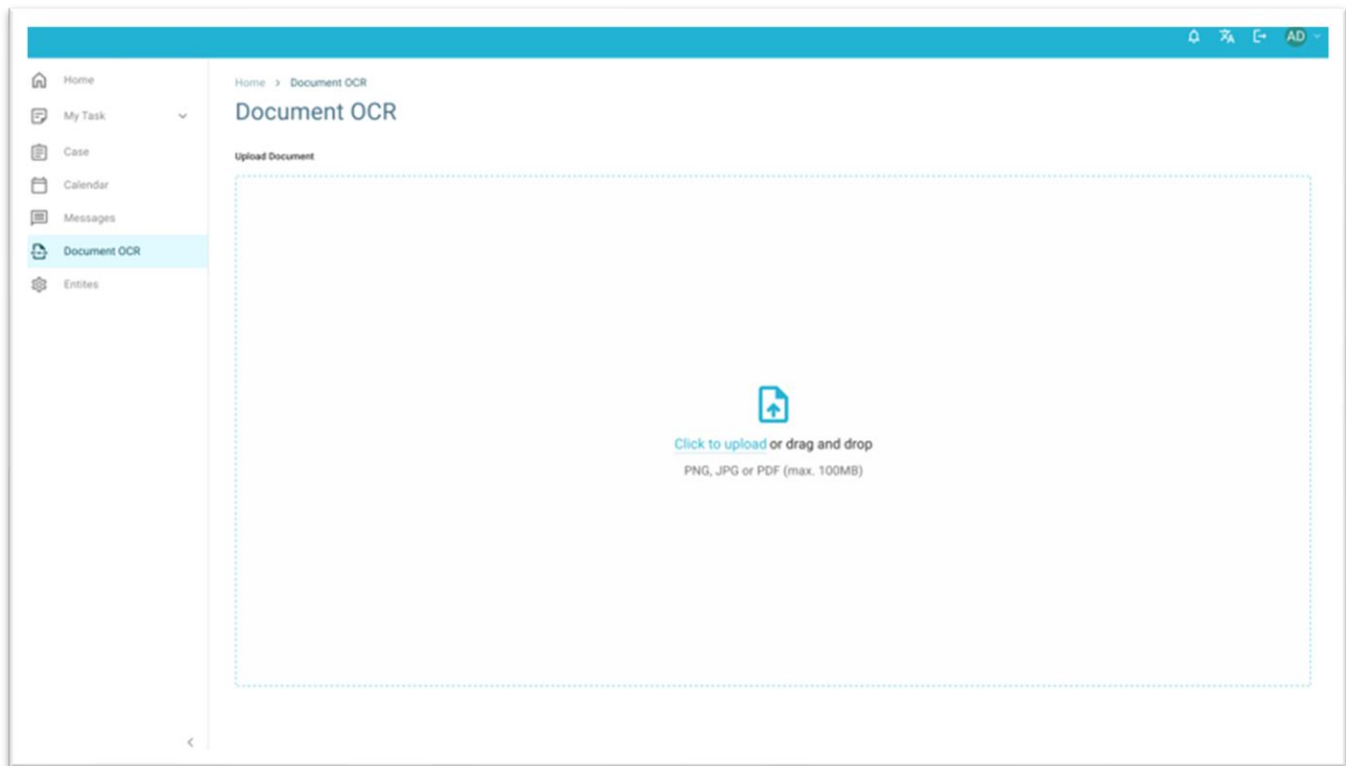

The image shows a login form with the following elements:

- Login** (Section Header)
- Username** (Label)
- admin** (Text input)
- Password** (Label)
- ******* (Text input, masked)
- ☒ **Remember me** (Checkbox)
- LOGIN** (Button)

Document Upload and Preview:

Upload documents with ease and preview historical records to ensure accuracy.

The screenshot shows the 'Document OCR' page with a document preview. The document is titled 'Form_NNC1_20240808.pdf' and is page 1 of 24. The form is for 'Form NNC1' and is titled 'A. 董事 (自然人) Director (Natural Person)'. It contains the following fields:

- 姓名 (Name)**: 陳大文 (Chan Tai Man)
- 英文姓名 (Name in English)**: CHAN Tai Man
- 其他姓名 (Other Names)**: Tai Man
- 中文姓名 (Chinese Name)**: 陳大文
- 英文姓名 (English Name)**: CHAN Tai Man
- 其他姓名 (Other Names)**: Tai Man
- 通訊地址 (Correspondence Address)**: 1501 室 (1501 Room), 金源本行 (Golden Source Bank), 德輔道中 107-111 號 (107-111 Des Voeux Road), 中環 (Central), 香港 / HONG KONG (Hong Kong)
- 電郵地址 (Email Address)**: info@genacct.com
- 身分證號碼 (ID Card Number)**: A123

At the bottom right, there are two buttons: 'Back' and 'Extract Data'.

Multilingual OCR Support:

Recognize text in English, Traditional Chinese, and Simplified Chinese for enhanced accessibility.

Key Points Extraction	
Extraction Result Preview	
Keywords	Extracted Key Points
AL1	Energy Consumption: Total energy consumption decreased by 23.03% year-on-year, optimizing elevator algorithms and adjusting air conditioning temperatures. Water Consumption: Total water consumption slightly increased by 1.92%, with a note consumption per employee of 4.78%. Greenhouse Gas Emissions: Total GHG emissions reduced significantly by 38.52%, with indirect emissions showing decreases of 11.53% and 43.73% respectively. Non-hazardous Waste: Overall production of non-hazardous waste went up marginal a slight increase in paper waste recycling. Hazardous Waste: There was a minimal change in the total production of hazardous v slight reduction of 0.50%.
AL2	Greenhouse Gas Emissions: Total GHG emissions (Scope 1 and 2) amounted to 178,661 decrease of 38.52% from the previous year. Direct GHG Emissions: Direct GHG emissions (Scope 1) reached 47,488.68 tonnes, show compared to the prior year. Indirect GHG Emissions: Indirect GHG emissions (Scope 2) were reported at 14,480.961 significant reduction of approximately 43.73% from the last reporting period. GHG Emissions Intensity: The total greenhouse gas emissions per employee (Scope 1, to be 1.33 tonnes/employee, indicating a substantial intensity decrease of about 42.61
AL3	Hazardous Waste Production: Total production of hazardous wastes (tonnes) Hazardous Waste Intensity: Production of hazardous wastes per employee (kg/emplo
AL4	Total production of non-hazardous waste: The total production of non-hazardous was 101.84 tonnes. Production Intensity of non-hazardous waste: The intensity in terms of production of n per employee was 7.74 kg/employee.
AL5	Greenhouse Gas Emission Targets: Company achieved notable results in energy cons and emission reduction through refined energy consumption management. Energy Conservation Steps: Optimized elevator riding algorithm, adjusted air conditio lighting technology, conducted in-depth inspection of "Five Switches" every day. Water-saving Initiatives: Modified drip irrigation and installed water recovery systems top outlet pressure. Waste Reduction Tactics: Outsourced printing services, recycled used papers for offic waste batteries per national standards, limited supply of non-essentials at the fitness Energy Conservation Measures: GF Securities set energy conservation and emissions i 2022, specifically aiming to reduce office space electricity consumption by approxims achieve this through adjustments in air conditioning temperature, operation hours o conditioners, and the addition of a refrigerant-cooled air conditioner for data center c Emissions Reduction Efforts: The company outlines steps taken to meet their emission

CHINA DEVELOPMENT BANK FINANCIAL LEASING CO., LTD. Environmental, Social and Governance Report 2021 35

6.4 ADOPTING LOW-CARBON OPERATION

In the process of operation, the emissions of the Group are mainly wastes produced from office operations. Use of resources mainly includes consumption of electricity and natural gas, as well as fuel consumption by official vehicles. The Group integrated green environmental protection concept into daily office work and operation, formulated management systems such as the China Development Bank Financial Leasing Co., Ltd.'s Administrative Measures on Printing (), and China Development Bank Financial Leasing Co., Ltd.'s Implementation Guidelines for Management of Drivers (), strengthened our presence in bringing into play the low-carbon operation concept through water conservation, energy conservation and emission reduction, green office and waste management, and reduced the impact on the environment and natural resources.

In 2021, the Group generated no major pollution and impact on the environment in its operations, and there were no issues in sourcing water that is fit for purpose.

In 2021, the Group set forward ESG targets in the two areas of "greenhouse gas emissions" and "use of energy" based on the actual situation of its operation under the principle of "materiality". We will continue to improve the approaches to achieve the targets and regularly track the progress towards completion.

Environmental Target	Work Area	Specific Measure	Time Limit
Reduce greenhouse gas emissions from vehicles	Overall fuel consumption of official vehicles or number of times official vehicles are used	<ul style="list-style-type: none">Overhaul official vehicles regularly to reduce fuel consumption per kmStrictly record the fuel consumption and mileage of vehicles to quantify the use of official vehicles in a transparent mannerSpecify the principles for using official vehicles, strictly approve the use of official vehicles and reduce the number of times they are used	Long term
	Penetration rate of electric or hybrid vehicles	<ul style="list-style-type: none">Gradually increase the proportion of new energy official vehiclesMonitor the energy consumption of facilities and equipment	Long term

Simple Summary of Extraction Result

System / Equipment	Identified EMO	EMO Category (I / II / III)
Lighting	Retrofit T5 4' Fluorescent Tube by T5 LED 4' Tube	II
Lighting	Retrofit T5 2' Fluorescent Tube by T5 LED 2' Tube	II
Air-conditioning	Retrofit 28 Unitary Air-con with Grade I Unitary Air-con	III

Findings

Some Location lighting LPD exceeds the BEC requirement.

For the improvement of LPD and to reduce energy costs, it is recommended to replace the existing lighting by LED lamp or LED tube.

The cost and benefit analysis of the T5 Lighting retrofitting to T5 LED lighting has more high-efficiency

Justification of EMO

Retrofit T5 4' Fluorescent Tube by T5 LED 4' Tube can save up to 3.44% energy (439,633.11 kWh), \$571,523.05 annually with a 1.97-year payback period.

Retrofit T5 2' Fluorescent Tube by T5 LED 2' Tube can save up to 0.30% energy (38,862.49 kWh), \$50,821.24 annually with a 3.91-year payback period.

Retrofit 17 Unitary Air-con with Grade I Unitary Air-con can save up to 0.24% energy (30,783.97 kWh), \$40,019.16 annually with a 9.02-year payback period.
