

# Contact Us

We're an innovative AI startup pioneering Agentic AI—next-generation autonomous systems that think, learn, and act independently to solve complex tasks. By combining cutting-edge large language models (LLMs) with multi-agent collaboration, we deliver scalable, adaptive solutions that reduce costs and boost efficiency.

Where AI Meets Justice

Turn Disjointed Statements into a Clear,  
Actionable Case Narrative!

# CaseWeave

CaseWeave is an advanced AI-powered application designed to revolutionize how criminal investigations are processed. It takes multiple, often conflicting, witness statements, police reports, and testimonies — and consolidates them into a clear, concise, and visual criminal case summary.

## How it works

By leveraging natural language processing (NLP), timeline analysis, and credibility scoring, CaseWeave empowers investigators, legal teams, and analysts to quickly identify key facts, inconsistencies, and gaps in narratives .

### Upload Statements

Users upload witness statements, police reports, media files, or documents.

### Analyze Events

Natural Language Processing (NLP) extract key details (people, location, actions).

AI agent cross-references statements to detect contradictions or gaps

Contextual analysis assigns a rust score to each statements.

### Generate Cases

Brief story: a coherent summary of the event.

Timeline with colour Codes

Inconsistency Alerts: Side-by-side comparison of conflicting Statements

## Use Cases

CaseWeave is more than just a tool – you're your intelligent assistant in the pursuit of justice. Whether you're solving crimes, preparing for trial, or conducting internal investigation, CaseWeave give you the edge you need.

### Law Enforcement

Transform scattered witness accounts into a unified case file for prosecutors.

### Legal Teams

Identify flaws in opposing counsel's arguments during discovery.

### Insurance Fraud Units

Detect false claims by analyzing inconsistencies in accident reports.

### Corporate Investigations

Resolve HR disputes (e.g. harassment cases) with structure, evident-backed reports.

### Government Agencies

Audit compliance violations or corruption allegations efficiently
