Filez AI assistant – Intelligent Content Generation

The screenshot displays the Filez AI assistant interface within a document editor. The top menu bar includes 'Edit', 'Insert', 'Format', 'View', 'Team', and 'Efficiency'. The 'AI Test' tab is active. A dropdown menu for 'Filez AI' is open, showing 'Content Creation' and 'Format Settings'. The main text area contains a list of bullet points: '- Software updates and patches.', '- Hardware inspections and component replacement as needed.', and '- System optimization and performance tuning.' Below this is a section titled '### Software Updates and Patches' followed by a paragraph: 'Software updates and patches are critical for maintaining the health, security, and functionality of any system. Here's an extended look into their importance and implementation:'. A blue callout box points to this text, stating 'RAG-based Content Generation'. The Filez AI assistant window is open, showing a search bar with the placeholder text 'Enter directly or select functionality from the I'. Below the search bar is a list of options: 'Optimize content', 'Continued writing perfection', 'Extended content', 'Summary', 'See more', 'Translation', and 'Translated into Chinese'. A second blue callout box points to this list, stating 'Function Call + MCP Server Ready'. The bottom status bar shows 'PAGE: 1 Page: 1 of 5 Section: 1 of 1 Row: 29 Column: 81 Words: 1330'.

Filez Intelligent Document Platform

Empowering the next generation of intelligent applications

Data Structuring

Bridge structured and unstructured data for automated document extraction, insertion, and replacement.

Components—Functional Description

Components—Performance Metrics

Components—Visual Interface

Smart Tagging

Automatically tag and redact key information with intelligent recognition.

Smart Extraction

Extract critical document data to drive relevant workflows automatically.

Content Reference

Reference content with one click, formats adapt to placement.

AI Content Generation

Generate, summarize and polish documents using LLMs.

Hi, I'm Filez AI

Smart Writing

Support intelligent content generation using templates.

Smart Translation

Support multilingual translation for cross-language document processing.

Smart Review

Enable intelligent automated review to ensure data accuracy and compliance.

Docs Comparison

Identify differences, locate changes, ensuring consistency and review efficiency

Split & Merge

Split or merge documents by rules with automatic format adaptation for improved processing.

Format Conversion

Support multiple document format conversions while maintaining data integrity and compatibility.

Smart Interaction

Apply batch formatting and text to table transformation for streamlined document standardization.

1. Infuse enterprise applications with AI superpowers.
2. Pre-built connectors for seamless ERP/CRM/CLM/BPM integration.
3. Comprehensive content processing and protection capability.
