

Automatic Document AI

TRANSFORM YOUR DOCUMENT
PROCESSING WITH CUTTING-EDGE AI

LAURRY
AI SYSTEM

*Speed up your
Document & Operation
by Over 50 Times*

Advanced OCR

Accurately extract text from scanned documents, PDFs, and images with transformer-based Optical Character Recognition.

Data Extraction

Automatically collect structured and unstructured data, transforming it into actionable insights for your business.

AI-Powered Analysis

Utilize AI to analyze extracted data, uncover patterns, and classify the data with user-defined automatic operation.

**Speed up
x 50**

**Support Formats
Image, PDF, Fax**

Text Recognition + AI Analysis Technology

Text and Image Intelligent Understanding

By our latest multimodal intelligent document AI model, our system enables end-to-end recognition and structured understanding of text and images, powered by generative AI and transformer-based OCR. It supports multiple data sources by extracting structured data and automating the process.

Invoice, Fax and Financial Document Recognition

Our solutions supports complicated formats with high accuracy. The system can recognize various documents including invoices, purchase orders, receipts, memos, customs declarations and contracts.

Powerful Intelligent Document AI

- High-Speed Scanning
- Document Automation Collection
- Meaningful Information Extraction
- Data Format Conversion
- Correction Verification
- User-Friendly Dashboard
- Classification by Intelligence
- Real-time Monitoring
- Fine-tuned OCR Model for Higher Accuracy
- Output Management
- Reporting and Logging
