All Existing Features of Propman Living App (Continue)

Smart IoT & Hardware Integrations:

An-site Hardware

- Self-Service Kiosk
- Supports Octopus payments and wristband printing for facility access
- Smart Access Control Systems (via third-party integrations)
- Includes QR Code, IC card, and Bluetooth unlocking options

Mobility & Transport

- Shuttle Bus ETA & Push Notifications
- MTR & CityBus Real-Time ETA (Coming Q3 2025)

Walue-Added Services

- Marketplace for resident-exclusive goods and services
- Loyalty Points System (Coming Q4 2025)
- Redeemable for selected offers within the app ecosystem

Additional features that can enhance operation efficiency, increase user satisfaction and reduce cost.

- 1. **Propman AI Chatbot**: The Propman AI chatbot revolutionizes resident satisfaction and reduces the workload for management staff. Powered by cutting-edge technology from OpenAI's ChatGPT, our chatbot leverages a knowledge base created by uploading documents to the Propman backend portal. This enables our system to learn and provide residents with answers in both text and audio formats, ensuring a seamless and convenient user experience.
- 2. Community Board Module: With Propman's Community Board module, residents can create posts within the living app, fostering enhanced communication and community bonding. Others can respond to these posts by sending direct messages to the author. To maintain security and exclusivity, only valid residents have access to the community board. Additionally, a post approval feature can be enabled, allowing management staff to review and approve posts before they are made public, if necessary.
- 3. Parcel Collection Module: Our Parcel Collection module ensures residents receive timely notifications when a new parcel arrives. Residents can choose whether they prefer the parcel to be placed at the concierge or delivered to their unit by staff (if supported). To ensure security, residents obtain their parcels using a unique QR code that prevents others from mistakenly collecting their packages. For this service, a Bluetooth QR sticker printer will be acquired to provide a seamless experience.

4. Equipment Rental Module: The Equipment Rental module allows residents to request available equipment from the management office. This feature enhances communication and maintains a comprehensive log of all rental records within the system. Residents can easily place rental requests, further streamlining the process.

> Billing Module: Propman's Billing module offers residents a convenient 5. platform to view their monthly management bills and supports online payment options. This feature significantly reduces administrative costs for the management office. Furthermore, we have integrated the Faster Payment System (FPS) payment gateway, which offers a competitive transaction fee rate, enhancing the overall payment experience for residents.

> > By implementing these modules, Propman aims to provide an allencompassing solution that enhances resident satisfaction, promotes community engagement, streamlines operations, and offers a seamless user experience.

What is the phone number of clubhouse?

The phone number of the clubhouse is 2975 1914 [15+source]. 7:16 PM

what is the price of badminton court?

The price for using the badminton court is as follows:

- Non-peak hour (Monday to Friday before 6:00 PM): \$50 per hour
- · Peak hour (Monday to Friday after 6:00 PM, Saturday, Sunday, and Public Holidays): \$70 per hour

Residents can make an advance booking up to 14 days in advance and reserve a maximum of 2 hours per day [11⁺source]. 1:42 PM

PropMan is integrating Assistant AI from ChatGPT 4.0 into a WhatsApp chatbot can bring specific benefits to property management companies and property developers:

1. Streamlined property inquiries: Property management companies and developers often receive a high volume of inquiries regarding available properties, pricing, amenities, and other details. ChatGPT 4.0 can handle these inquiries efficiently, providing accurate and up-to-date information about properties, saving time for both the company and the potential buyers or tenants.

2. Maintenance and support requests:

Property management companies often receive maintenance and support requests from tenants. Propman Chatbot can enable tenants to report issues, request repairs, or submit general inquiries regarding property maintenance. The chatbot can guide them through the process, collect necessary details, and escalate urgent matters to the appropriate team.

send me more details about table tennis facility 2:02 PM J/

The table tennis facility can be booked at a rate of \$50 per hour. Advance bookings are accepted up to 14 days in advance, and each residential unit can reserve the facility for a maximum of 2 hours per day [11⁺source]. 2:02 PM

Support Voice Message Can reply with Text or Voice

3. Real-time updates and notifications: Propman Chatbot can provide real-time updates and notifications to property management companies and

residents. It can inform them about new inquiries, scheduled property tours, maintenance requests, or any other important updates. This ensures that the company stays informed and can respond promptly to customer needs.

Building the Future of Living

19

4. Multilingual support for international clients:

Property management companies and developers often work with international buyers or tenants. Propman Chatbot's multilingual support can assist clients in their preferred language, breaking language barriers and providing a seamless experience to a diverse customer base.
