# AI Enabler

## Making Your Organization AI-Ready

# Flexible Co-Development Model

- To maximize knowledge transfer and maintain rapid iteration, MacGentic will embed AI specialists alongside your IT team. We will provide:

**Collaborative Development:**  
Paired programming sessions and code reviews to accelerate internal capability building

**Pre-configured Toolchains:** Ready-to-use Docker stacks, Dify prompt repositories and n8n workflows

**Train-the-Trainer Workshops:**  
Structured sessions to equip your team with the skills needed for ongoing maintenance and feature expansion

**Expert Guidance:**  
Best practices in LLM prompt tuning, vector-search integration and container security
