

Enterprise-Grade AI Workstation. On-Premises.

Secure AI Quotation Document Review Tool

The Secure AI Quotation Document Review Tool is an enterprise-grade, on-premises AI workstation that maximizes AI capabilities in a secure environment. Powered by the NVIDIA GB10 Grace Blackwell Superchip, it delivers exceptional performance for executing advanced AI models on-site. Its integrated App Centre provides secure access to curated AI applications, enabling enterprises to enhance innovation, streamline operations, and transform workflows while maintaining complete data control.

0 1 1 1 0 1 0 1 0 0 1 0

Integration

Deploy a suite of enterprise apps from a unified platform.

Sovereign Control

Confine all data and computation on-site.

Predictable Cost

Achieve a fixed-cost model with unlimited on-premises AI utilization.

Empowerment

Securely power AI with your private, proprietary knowledge base.

Professional-Grade AI Architecture

Hardware Specifications

| | |
|-----------------------|---|
| Core Processor | NVIDIA GB10 Grace Blackwell Superchip |
| Unified Memory | 128GB LPDDR5x |
| AI Model Support | Compatible with models up to 200 billion parameters |
| Computing Power | 1 Petaflop (1000 TFLOPS FP4) |
| Enterprise Networking | ConnectX-7 SmartNIC |
| Operating System | NVIDIA DGX™ OS |
| Application Platform | Pre-configured branch of enterprise AI applications |

AI-Powered Validation for Flawless Submissions

Flexible, User-Defined Rule Engine

Empower your team to directly input and manage custom quotation and compliance checking rules, tailoring validation to every unique tender's specifications.

Dynamic Rule Generation

Accelerate setup with automatic rule extraction from requirement documents and checklists. Maintain full control with intuitive tools for manual rule creation and editing.

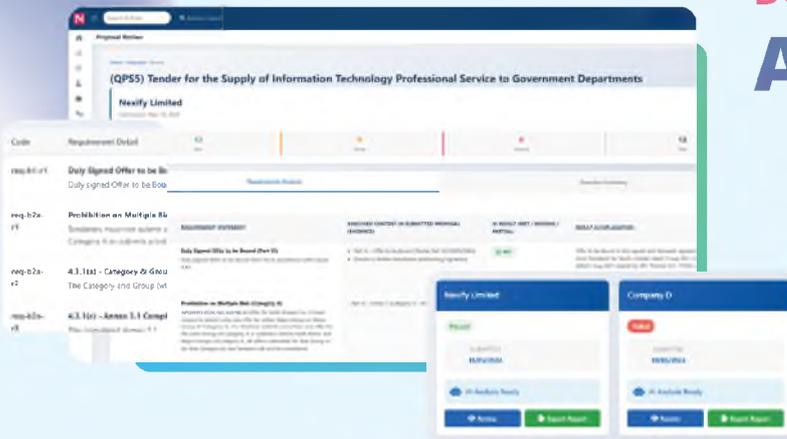

AI Validation & Smart Analysis

Our core AI engine validates your entire document package against any checklist, delivering a clear, actionable Analysis Report with Pass/Fail/Needs Review verdicts for each requirement.

Evidence-Backed Results & Detailed Findings

Leveraging LLM and RAG technology, the system provides traceable evidence for every finding. Reports detail missing items, identified issues, and incomplete document sections, complete with source document names and page numbers.

Designed for Intuitive Use Across All Critical Stages

- ✓ Tender Management
- ✓ Requirement Review
- ✓ Evaluating Contractor Proposal

Automated Document Intelligence

Uploads are automatically classified and matched to the correct checklist items, reducing manual sorting and ensuring comprehensive coverage.

Bilingual Processing & Reporting

Conduct full analysis and vetting in both English and Traditional Chinese, ensuring accuracy for regional and international tenders.

Professional Export & Integration

Generate polished Analysis Reports exported to Microsoft Word for formal delivery and Microsoft Excel for data review. All findings are cited with clear source evidence.

Complete Auditability & Transparency

Generate detailed User Audit, Transaction, and System Activity Logs. Maintain full oversight of the review process and demonstrate due diligence with comprehensive audit trails.
