On-Premise Next-Gen Office Virtual Assistant

(HKMA Use Case)

09 June, 2026

Microsoft Copilot is resource intensive

US\$30
user/month

*HK\$2.8M annually
for 1,000 users

0

data egress

Full security

Min
Capex

Cost control

Co-Pilot like capabilities at enterprise scale

- Review mails
- Draft replies
- Finetune emails

- Clean data
- Explain formulas
- Storytelling

- Summarize docs
- Auto rewrite
- Review docs

- Suggest images
- Generate notes
- Draft ppt flow

- Integrated in daily suite
 - No data leakage
- Turbo charge productivity

Your LLM, your network, and our orchestration layer

- Seamless integration
- Javascript/VSTO
- Always available

- Centralized checkpoint
- User authentication
- K8S scalable

- LLM agnostic
- LLM with RAG
- Lightweight LLM

Built for Government Requirements

Perpetual license support

No Office 365 required
Works on Office 21/24

Ringfenced LLM

Integrate with existing LLM
Zero data leakage

Your knowledge base

Existing RAG
No re-indexing

Validation that you can trust

- HKMA validated on perpetual MS Office license
- Compliant with environment & data governance
- BYO LLM (ringfenced LLM)
- Fully on-prem and managed; 0 data egress
- Quick adoption to work floor

Your choice: on-premise or cloud

VS

Fully air-gapped deployments supported
Zero cloud dependency

Demo: Spark your efficiency

The screenshot displays the Microsoft Outlook interface. At the top, there is a search bar and navigation icons. Below is the ribbon menu with tabs for File, Home, View, and Help. The Home tab is active, showing various action icons like New, Ignore, Block, Delete, Archive, Report, Reply, Forward, Meeting, Sweep, Move, Rules, Quick steps, Read / Categorize, Unread, Flag, Pin, Snooze, Policy, Print, More apps, Discover groups, and Undo.

The left sidebar shows the navigation pane with Favorites (Inbox, Sent Items, Drafts) and a folder for 32475@odcn.live (Inbox, Drafts, Sent Items, Deleted Items, Junk Email, Notes, Archive, Conversation History, Search Folders, Go to Groups).

The main content area is divided into two panes. The left pane shows a list of emails under the 'Focused' tab. The selected email is titled 'URGENT: Q2 User Churn Spike - Analysis Required' and is dated 6:42 PM. The right pane shows the email content, which includes the following details:

URGENT: Q2 User Churn Spike - Analysis Required

Subject: RE: URGENT: Q2 User Churn Spike – Analysis Required

James,

Thank you for the rapid response and the clear breakdown of what you can and cannot deliver. I appreciate your honesty.

You are right – the Board will not be satisfied with just a list of at-risk Users or behavior correlations. They will want to know *why* this is happening and *what we are going to do about it*.

I have decided to take this on myself. Please send me the complete dataset – all columns, including the raw exit survey comments and any notes your team has captured. I will personally review the data and synthesize the root causes.

Specifically, I need you to help me answer these three questions:

- 1. Why are our enterprise Users leaving at double the previous rate?**
What is the common thread? Is it a specific feature they all used? A specific account manager? A specific contract renewal quarter? I need to understand the narrative behind the numbers.
- 2. Why is APAC performing so poorly compared to other regions?**
