Group Members

vizper.ai

Company Introduction

Over 10+ years of experience in the innovative technology & digital entertainment industry

Solid brand building & R&D experience in Sales & Marketing Technology

Deep understanding of the digital landscape and industry pain points

Closely connected to innovative solution developers globally

100+ team members located in Hong Kong, Shenzhen, Guangzhou, Shanghai

Global Recognition

2024 & 2025

Recognized by the **Tatler Gen.T List** in 2024 and honored as a **2025 Forbes Deep Tech Innovative Entrepreneur**

2022

Together with six other leading Hong Kong scientific and technological innovations—including DJI Innovations, SenseTime, medical robotics, etc., was personally inspected by President Xi Jinping. The founder was also the only post-90s entrepreneur on site invited to have a close-up conversation with President Xi.

2021

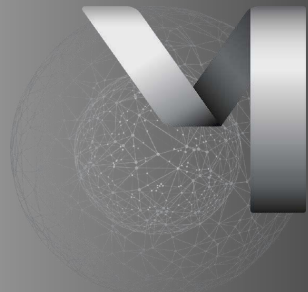

Awarded **Gold Award and Grand Award at the Hong Kong ICT Awards** which is an accolade officially recognized by the Hong Kong government and regarded as the highest honor in the tech industry.

2019

Won the runner-up award in the Hong Kong division of the IPIEC Global International SME Innovation and Entrepreneurship Competition. As the competition's sole representative from China, it was also named among the global top ten out of 3,800 patented projects.

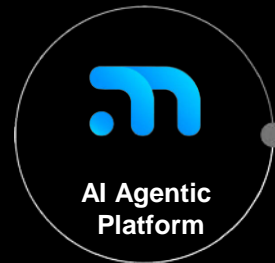

Powered by Matrix AI

AI transformation and consulting services to enterprises—including research publications, algorithm development, and data training solutions.

Unleash the power of workforce with the aid of AI Agentic AI Platform

Empowered by our Patented 3D holographic system, Holochat enable custom AI CS Agent for omnichannel services

Generating AI platform supporting picture and audio generation through omnichannel RAG chatbot

Computing Power

Enables efficient training and inference at scale

Robust Algorithm with Proprietary LLM Model

Defines how the AI processes and generates outputs

High quality data

Provides the foundation for accurate, reliable learning

Customizing AI for Clients...

Fine-Tuning and RLHF

Adapt top-tier foundational models to suit your business and unique data, enabling you to develop sustainable and successful AI programs from your enterprise's information.

Foundation Models

Integrate with all the top AI models, whether open-source or closed-source from **Hong Kong Local model**.

Enterprise Data

Data Engine allows you to seamlessly incorporate your enterprise data into these models, laying the foundation for sustainable strategic differentiation.

● 5 Levels of AI ●

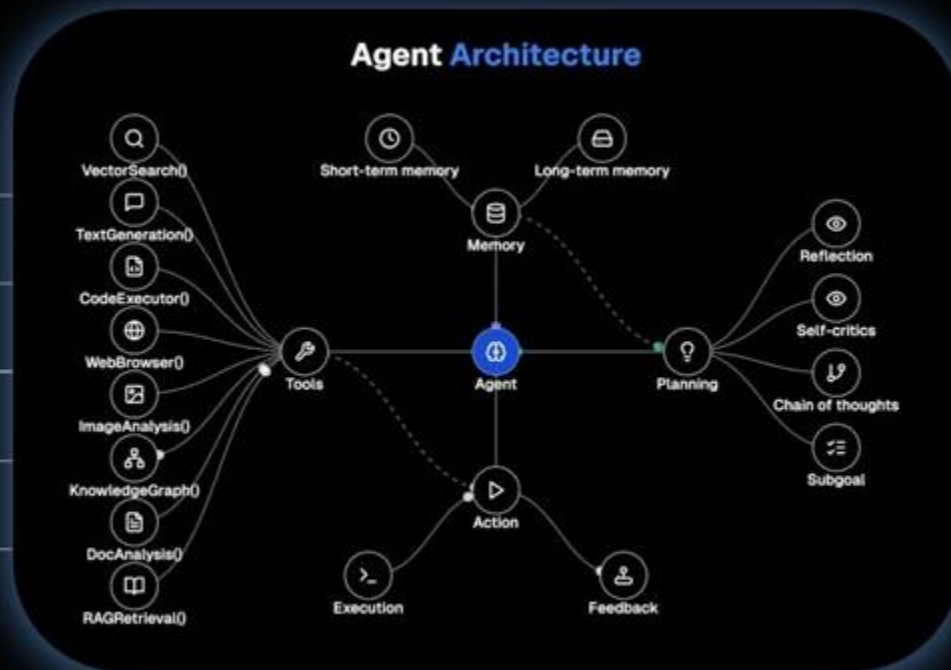

LEVEL 5: Organizational AI

LEVEL 4: Innovating AI

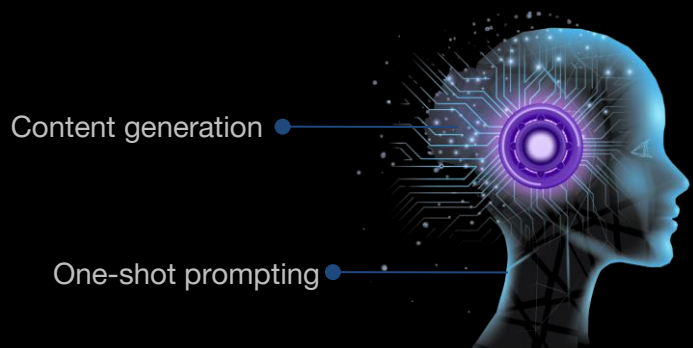

LEVEL 3: Agentic AI

LEVEL 2: Reasoning AI

LEVEL 1: Conversational AI

● Normal AI (e.g., ChatGPT-style assistant)

Generative AI: Thinking-oriented

VS

● Agentic AI

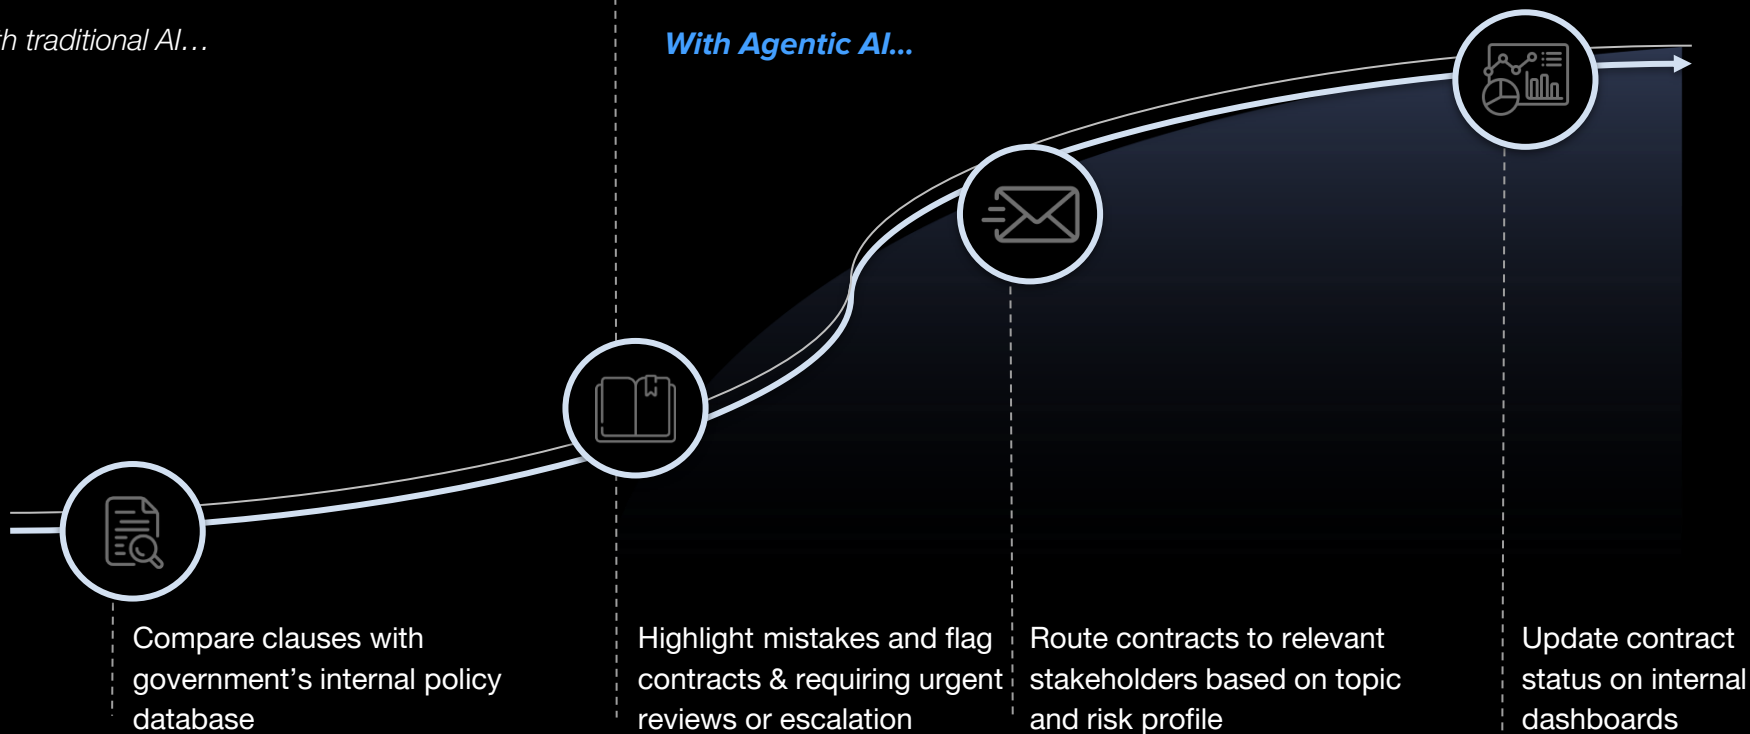

Agentic AI: End-to-end result delivery

Task: “Review internal compliance documentations.”

RAG Bot Agent Built

Use Case for A Leading Property Management Group: AI P.M. Control Hub for 200M+ sq.ft Floor Area

Centralized Security and Surveillance: AI-powered analytics flagging suspicious activity from live video and access data.

Tenant Query Management and Automated Ticketing: Maintenance inquiries and tenant issues are automatically categorized, prioritized, and directed to the right stakeholders, with status updates and tracking.

Cross System Integration: The hub consolidates integrations with building management systems, compliance tools, and lease management.

Before: 100% manual, heavy manpower for vendor/department communication.

After: 80%+ automated — ticket creation → analysis → CS → vendor assignment → report.

Introducing our Proprietary Model: Agentic AI Government Platform

“Shape the Future of Government with Agentic AI”

Challenges of AI Application for Government

Risk 1: High Production Costs

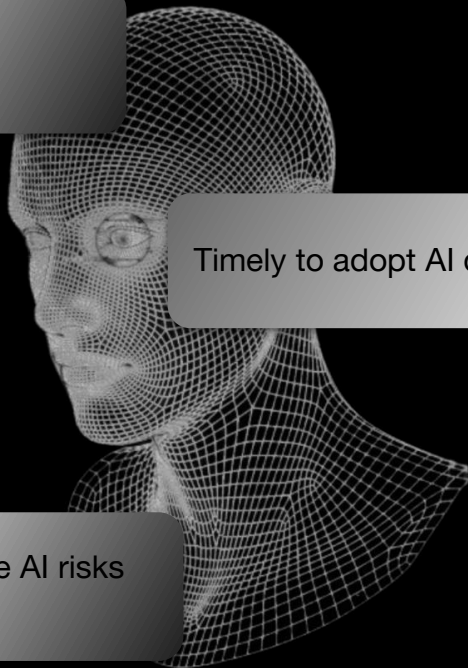

Custom platform-specific production requires substantial manpower and drives up costs.

Risk 2: Scalability Restrictions

Timely to adopt AI due to individual and different workflows.

Risk 3: Security Concerns

Use of off-the-shell products and off-premise AI risks government data and security compliance.

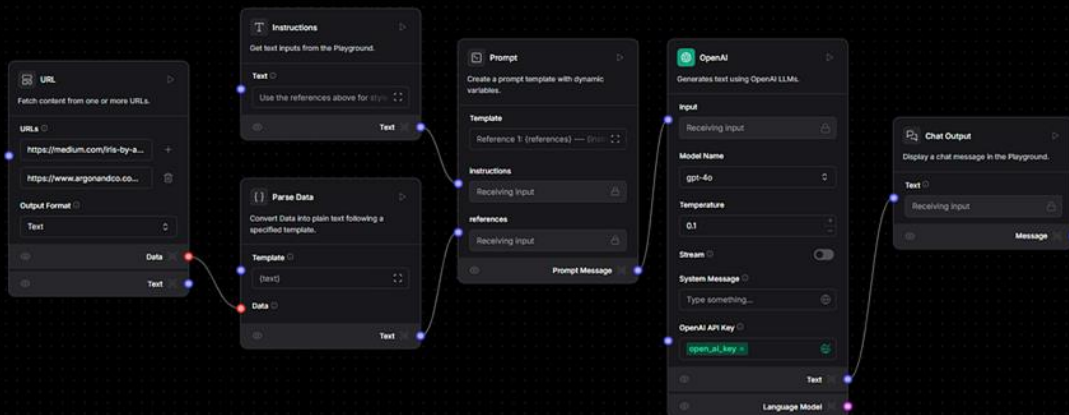

Key Feature 1: User-friendly Interface for the Non-Technicals

- Visual model for multi-step AI workflow
- Drag-and-drop with no coding required

Sophisticated Workflow in Minutes

Drag and drop to create AI chatbots and workflows that are capable of diverse tasks and evolving needs.

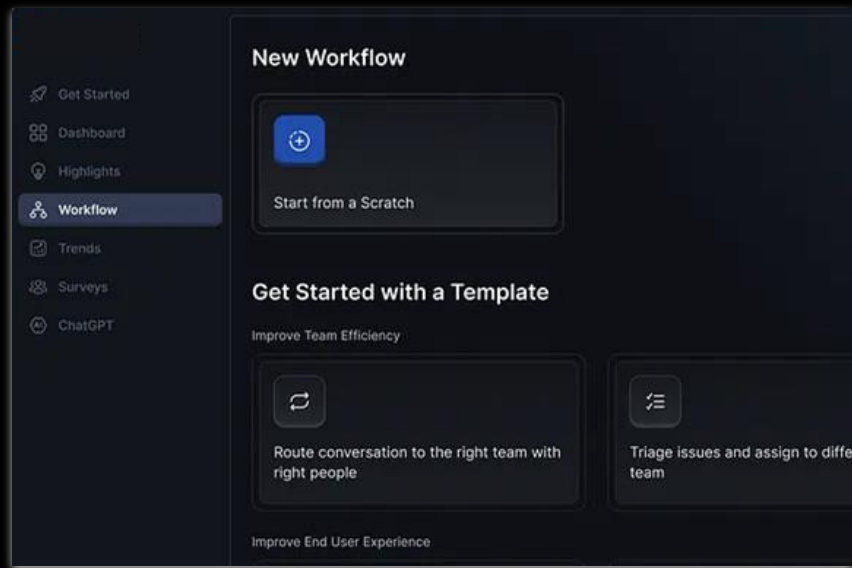

Key Feature 2: Agentic AI Workflow Template Marketplace

- Matrix AI's DSL framework makes it easy for teams to save, share, and build on each other's work.
- Allow third-party vendors to add AI agents, expanding capabilities and collaboration.
- Departments can reuse templates from others, reducing both time and cost.

100+ Pre-Built Templates

Loop everyone in to build AI workflow: *DSL format* makes it easy to save, share, and contribute seamless for the entire team.

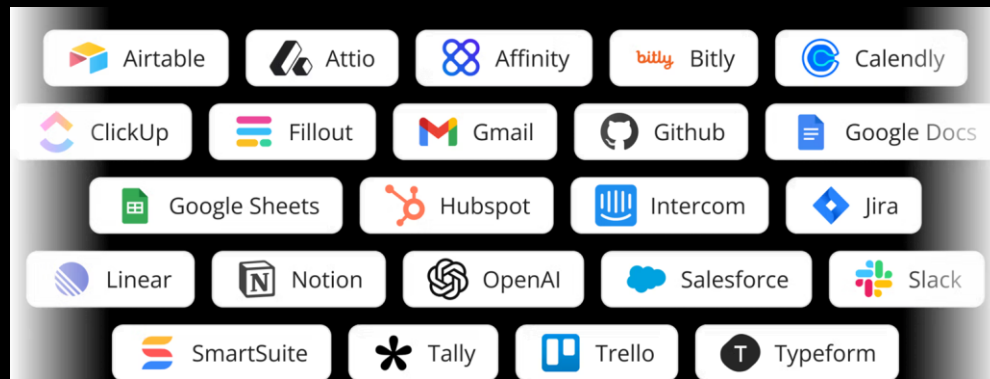

Key Feature 3: AI Store for Applications & Cross-Platform Tools

Supercharge AI Applications with Integrations

- BaaS (Backend-as-a-Service): Access to 300+ global software applications, LLM, tools, via API / MCP standards.
- Plugins: Enhance functionality with a single download
- Departments can reuse templates from others, reducing both time and cost.

Over 300+ Apps

Publish in the Way You Want

Choose from flexible publishing options tailored to your diverse needs, while BAAS handles the complexities

Secure Deployment for Government: On-Premise & Fully-Integrated

Production Ready since Day One. You're All Set

● Scalable

● Stable

● Secure

On-Premise Deployment

Full-control over data by leveraging **private cloud DCI** or other private server, complying government security standards and protecting sensitive government data

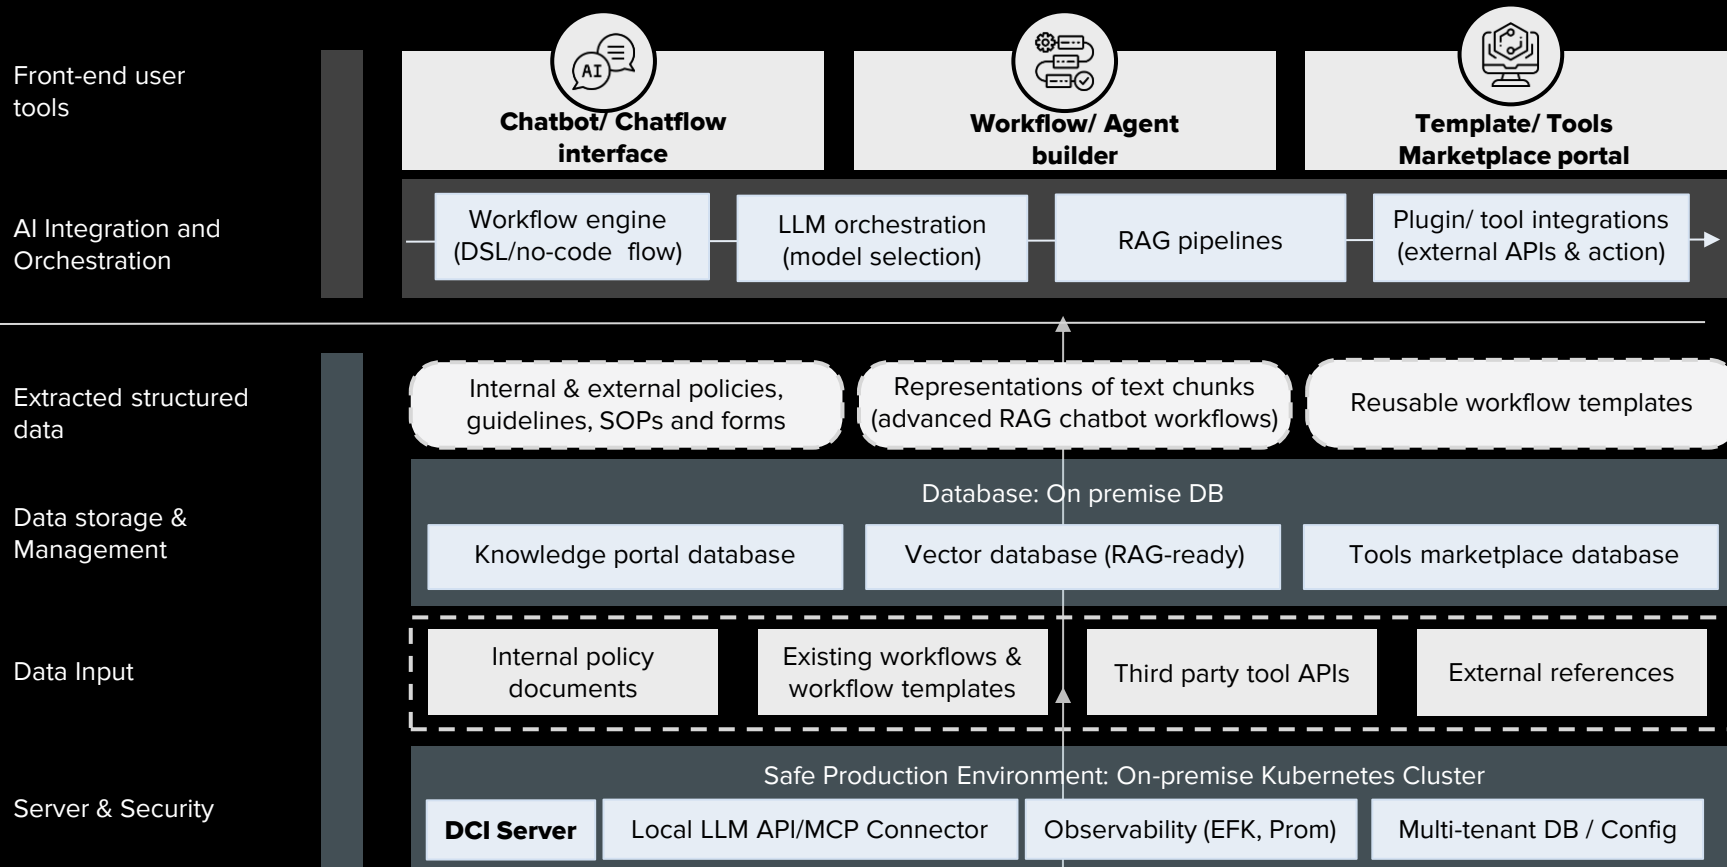

Enterprise
grade security

The diagram features a central circle with the text 'Enterprise grade security'. This circle is part of a larger, stylized circular structure with a light blue outer ring and a purple inner ring. A horizontal bar with a light blue left circle and a purple right circle passes behind the central circle.

Secure Data Protection

Ensures high standards of data security through robust infrastructure and protocols, safeguarding sensitive information in compliance with government regulations.

Solution Architecture for Agentic AI Government Platform

**We see the future
AND we're capable to
bring it forward to you and
your customers**
