

VOICE AI
POWER VOICE WITH AI

ConVoice™

**AI Meeting Transcription
Terminal**

VoiceAI Technologies Hong Kong Limited

Pain Points Discovered in Meeting Rooms

Pain points

- Rely on cloud services
- Risk of data leakage

No Internet

01

Local deployment,
protects privacy

- Manual notes taking:
- Time-consuming
 - Inaccurate

Not just scripts

02

AI generates TO-DO,
improves efficiency

Transcription results:
hard to read
without speaker ID

Knowing Who

03

Voiceprint recognition,
ID can be traced

Product Overview

Transforming Confidential Conversations into Actionable Intelligence

ConVoice™ is a smart meeting transcription terminal featuring **information protection**. Combining **local** speech-to-text transcription, voiceprint recognition and an **offline-deployed** LLM, it can real-time transcribe “who said what” in multi-person meetings and deeply analyze the content.

Privacy Protection

- Localized deployment, with data never shared externally
- Run locally without internet

WHO said WHAT

- Mandarin/**Cantonese**/English:
Support commonly used languages
- Precise identification of speaker ID

Embedded LLM

- Localized deployed LLM enables automatic meeting summarize without internet
- Output TO-DO list
- Conduct high-frequency keyword statistics

Features

Local Deployed

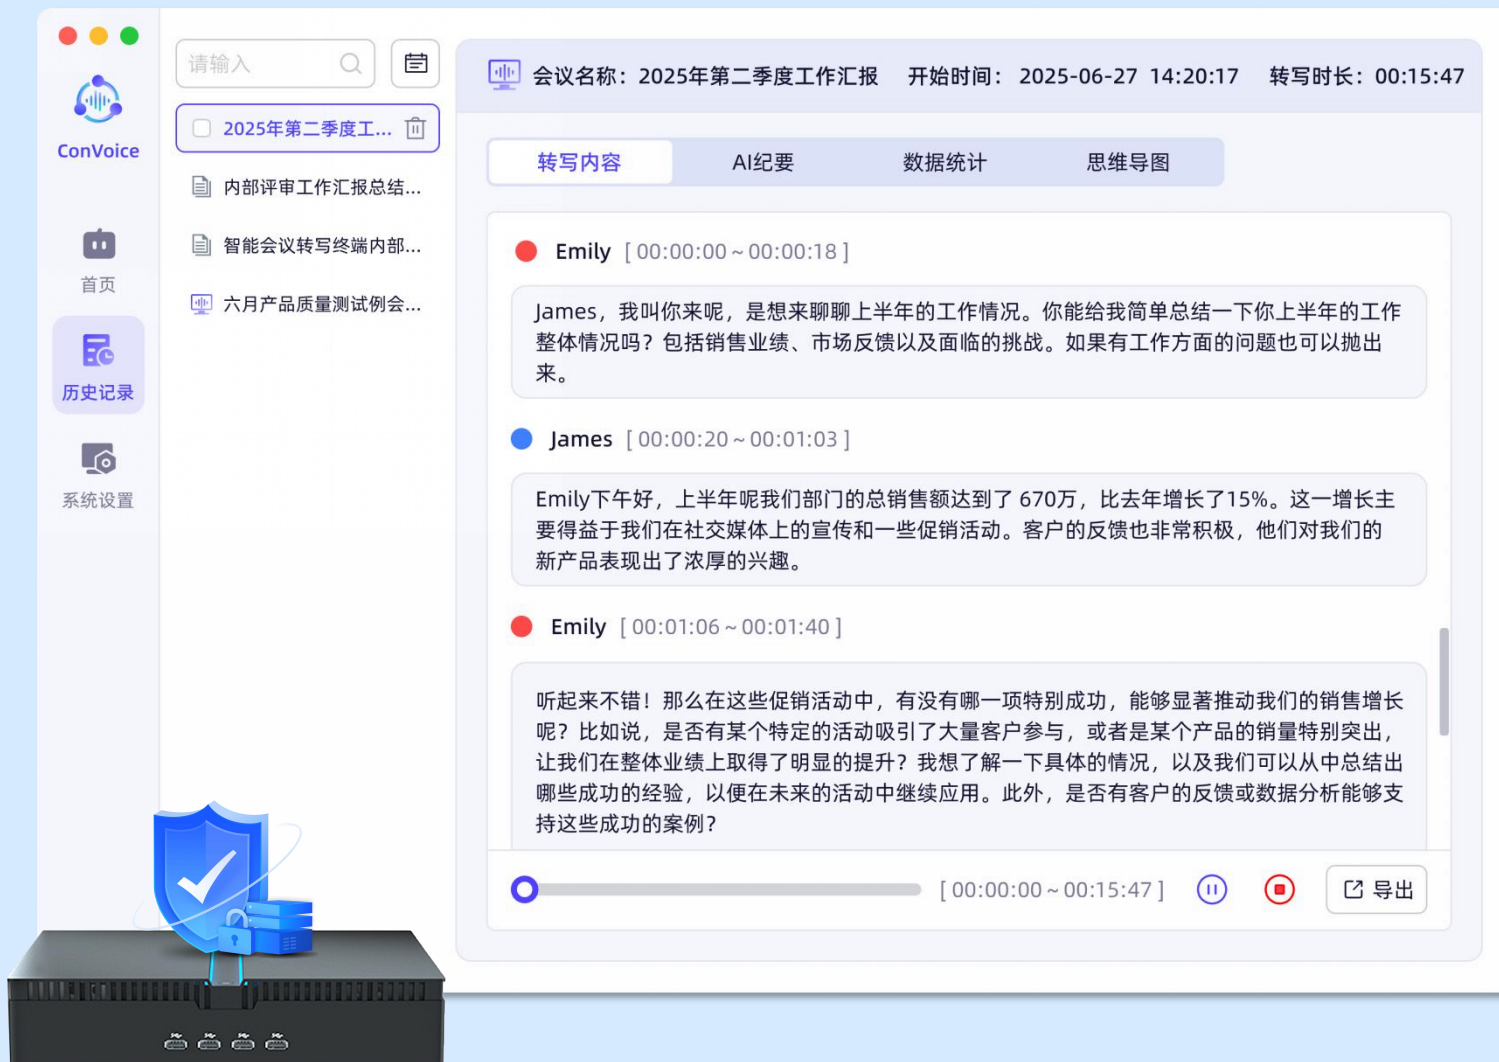

Privacy Protected

- Embedded algorithms
- No risk of data leaking through internet

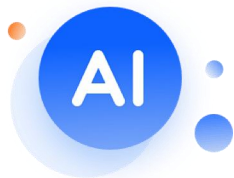

Convenient & fast

- No Internet needed
- PLUG-AND-PLAY
- Quick Start

Confidential

Features

Embedded AI LLM model

Logical & focused

- AI summarizes To-Do list and high-frequency words

High efficiency

- Record without missing points
- Automatically capture key information

系统设置

1.项目进度

当前进度: 86% (较上周增长10%)

关键里程碑: 未完成 (由于其他紧急项目插进)

主要风险点: 风险描述 (负责人: soso, 解决期限: 2025/07/24)

2.各部门汇报

技术部:

①完成内容: 模块A开发 (100%)、模块B测试 (70%)

②存在问题: 接口性能瓶颈 (响应时间超出预期20%)

待确认事项: 开始模块C开发

设计部:

①完成内容: UI终稿交付 (V3.2版本)

②待确认事项: 主色调是否需要调整 (需市场部反馈)

3.行动计划

任务描述	负责人	协作者	截止时间	优先级

Features

Language & Terminology

Adaptability

Multi-Language Support

- Mandarin
- Cantonese
- English

Custom Vocabulary

- reflect domain-specific language accurately
- Reduced errors in specialized contexts

Confidential

ConVoice™ is equipped with advanced multi-language models, enabling seamless real-time transcription and analysis across

Users can easily add and update industry-specific terms, proprietary jargon, or frequently used hotwords (e.g., product names, project codes, technical terms)

How ConVoice Differentiates from Cloud Giants & Hardware Vendors

Competitors

☁ Cloud-based transcription
Data privacy concerns
Requires internet access

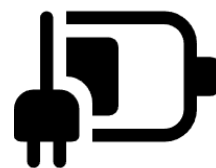

ConVoice offers **offline** transcription and **local AI** analysis — ideal for **compliance-critical** scenarios

Collaborators / Integrators

Hardware input + transmission
Without AI transcription & analytics

ConVoice acts as a **plug-in layer**, transforming existing audio devices into **smart meeting assistants**
