

ADNOTO

**Intelligent Vetting. Instant Decisions.
Complete Confidence.**

AI-native Application Management & Vetting Platform

Pain Points: Applications demand consistent, transparent, and auditable vetting

Common Application Types

\$ Access / Entitlement

👤 Selection / Hiring

🏛️ Governance / Control

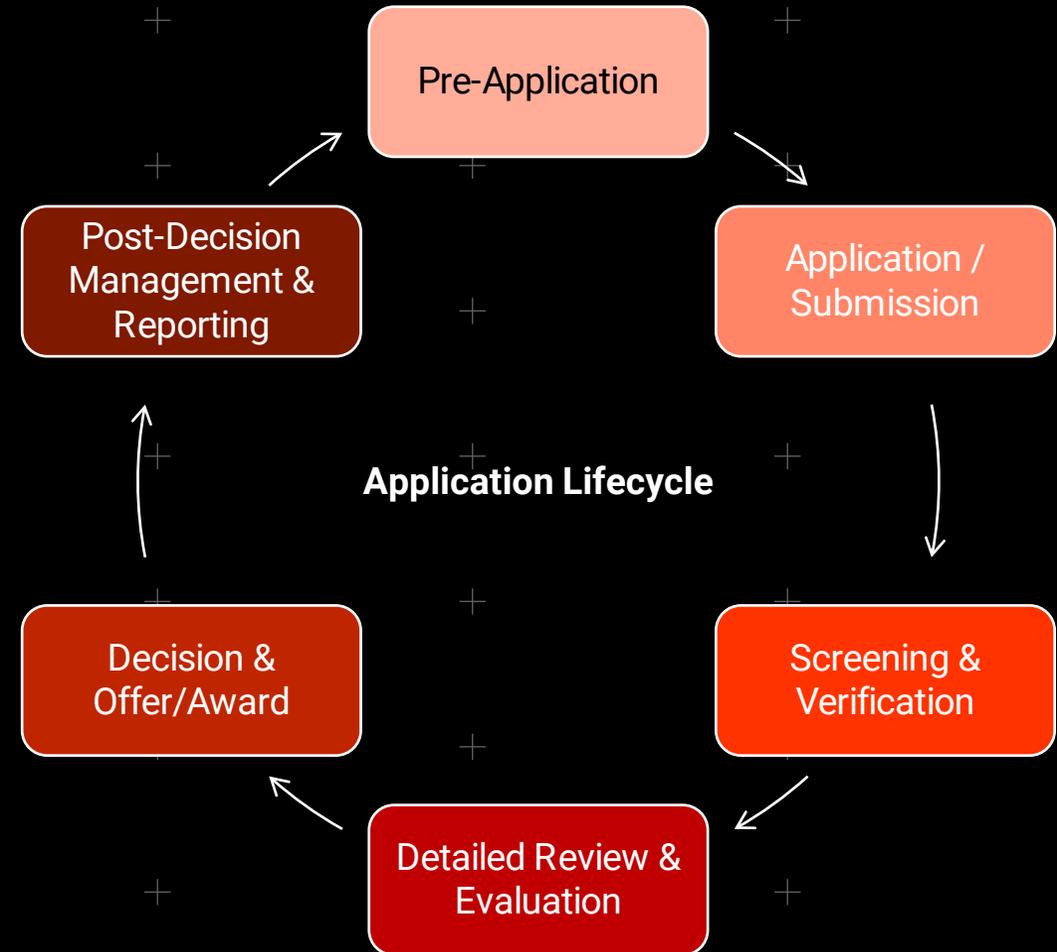

🌟 Recognition / Awards

🌐 Membership

- ⚠️ Manual review of applications is time-consuming
- ⚠️ Human error and bias in screening decisions
- ⚠️ Need for transparency and audit trails in vetting processes
- ⚠️ Regulatory compliance and reporting requirements
- ⚠️ Difficulty tracking application status across multiple stakeholders
- ⚠️ Risk exposure from inadequate due diligence

Industry Trends: Applications demand consistent, transparent, and auditable vetting

- AI-powered due diligence reduces review time by 50-70%
- Growing regulatory scrutiny requires comprehensive vetting documentation
- Digital transformation demands automated workflows
- Rising need for standardized, defensible vetting processes

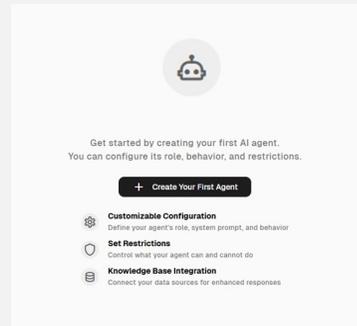

Augment All of Your Application Workflows on One Integrated, Secure Platform

AI built for complex assessments and due diligence.

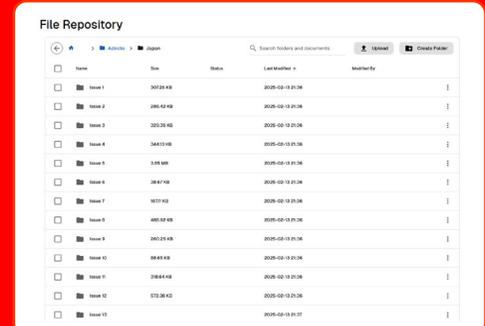

AI Workflow Builder

Build assessment workflows aligned with your vetting requirements.

Form Builder

Comprehensive form-building tools with version control, change request management, and shareable links.

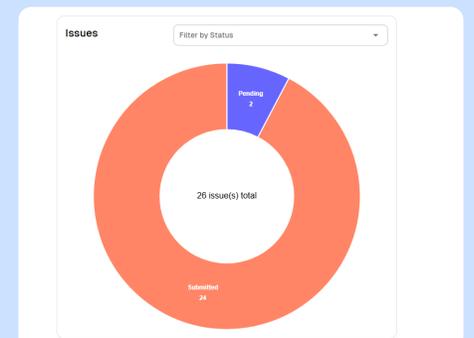

Case Management

Fully-customizable application stage, type, approval steps, notifications, permission control, and reporting features.

Issue ID	Content Verification	Status	Question
12	Content Verification	Active	Is there any request by the target company to apply a separate and longer term for "retained Confidential Information"?
13	Content Verification	Active	Is the separate and longer term for "retained Confidential Information" added to the term of the confidentiality agreement is not more than 3 years?
14	Content Verification	Active	Is the term for standstill (except if there are publicly listed securities), employee non-solicit and no contact provisions limited to 12-24 months?
15	Content Verification	Active	Are there any terms exceeding the foregoing upper limit?
16	Content Verification	Active	Is the stated governing law New York Law, Hong Kong Law, English Law or Singapore Law?
17	Content Verification	Active	Is the stated governing law Philippines Law, Indonesia Law, Malaysia Law, or Vietnam Law
18	Content Verification	Active	Are disputes to be resolved in New York courts (assuming New York law or the laws of other U.S. states govern)?
19	Content Verification	Inactive	Is proposing international arbitration under the rules of the International Chamber of Commerce (ICC)?
20	Content Verification	Inactive	Does NDA accept arbitration under UNCITRAL (with the administering body being HKIAC or SIAC), LCIA, HKIAC, or SIAC rules?

Enterprise-Grade Security

Robust, industry-standard protection with zero training on your data.

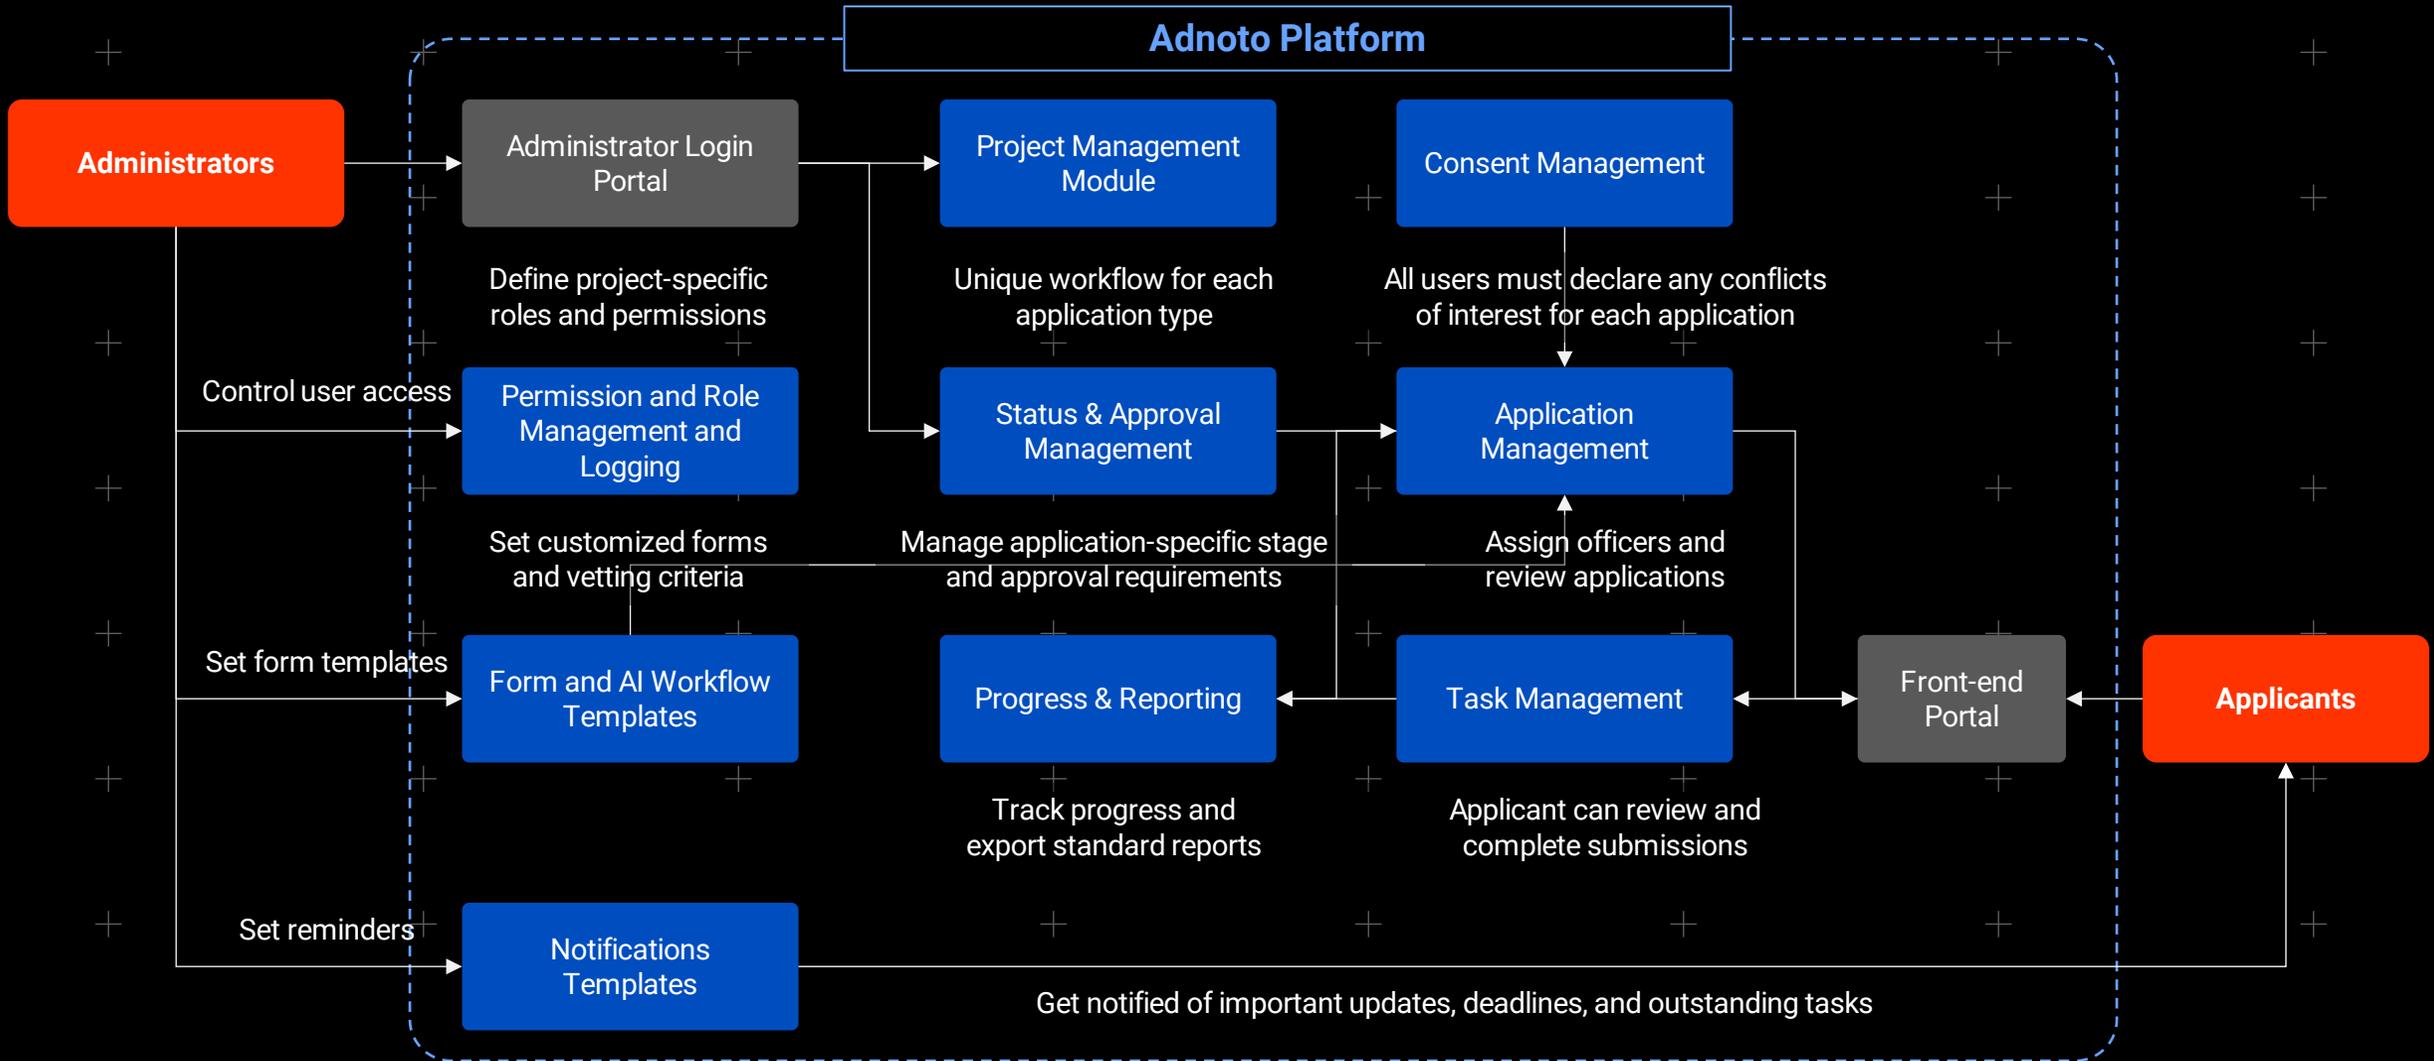

Beyond Basic Forms

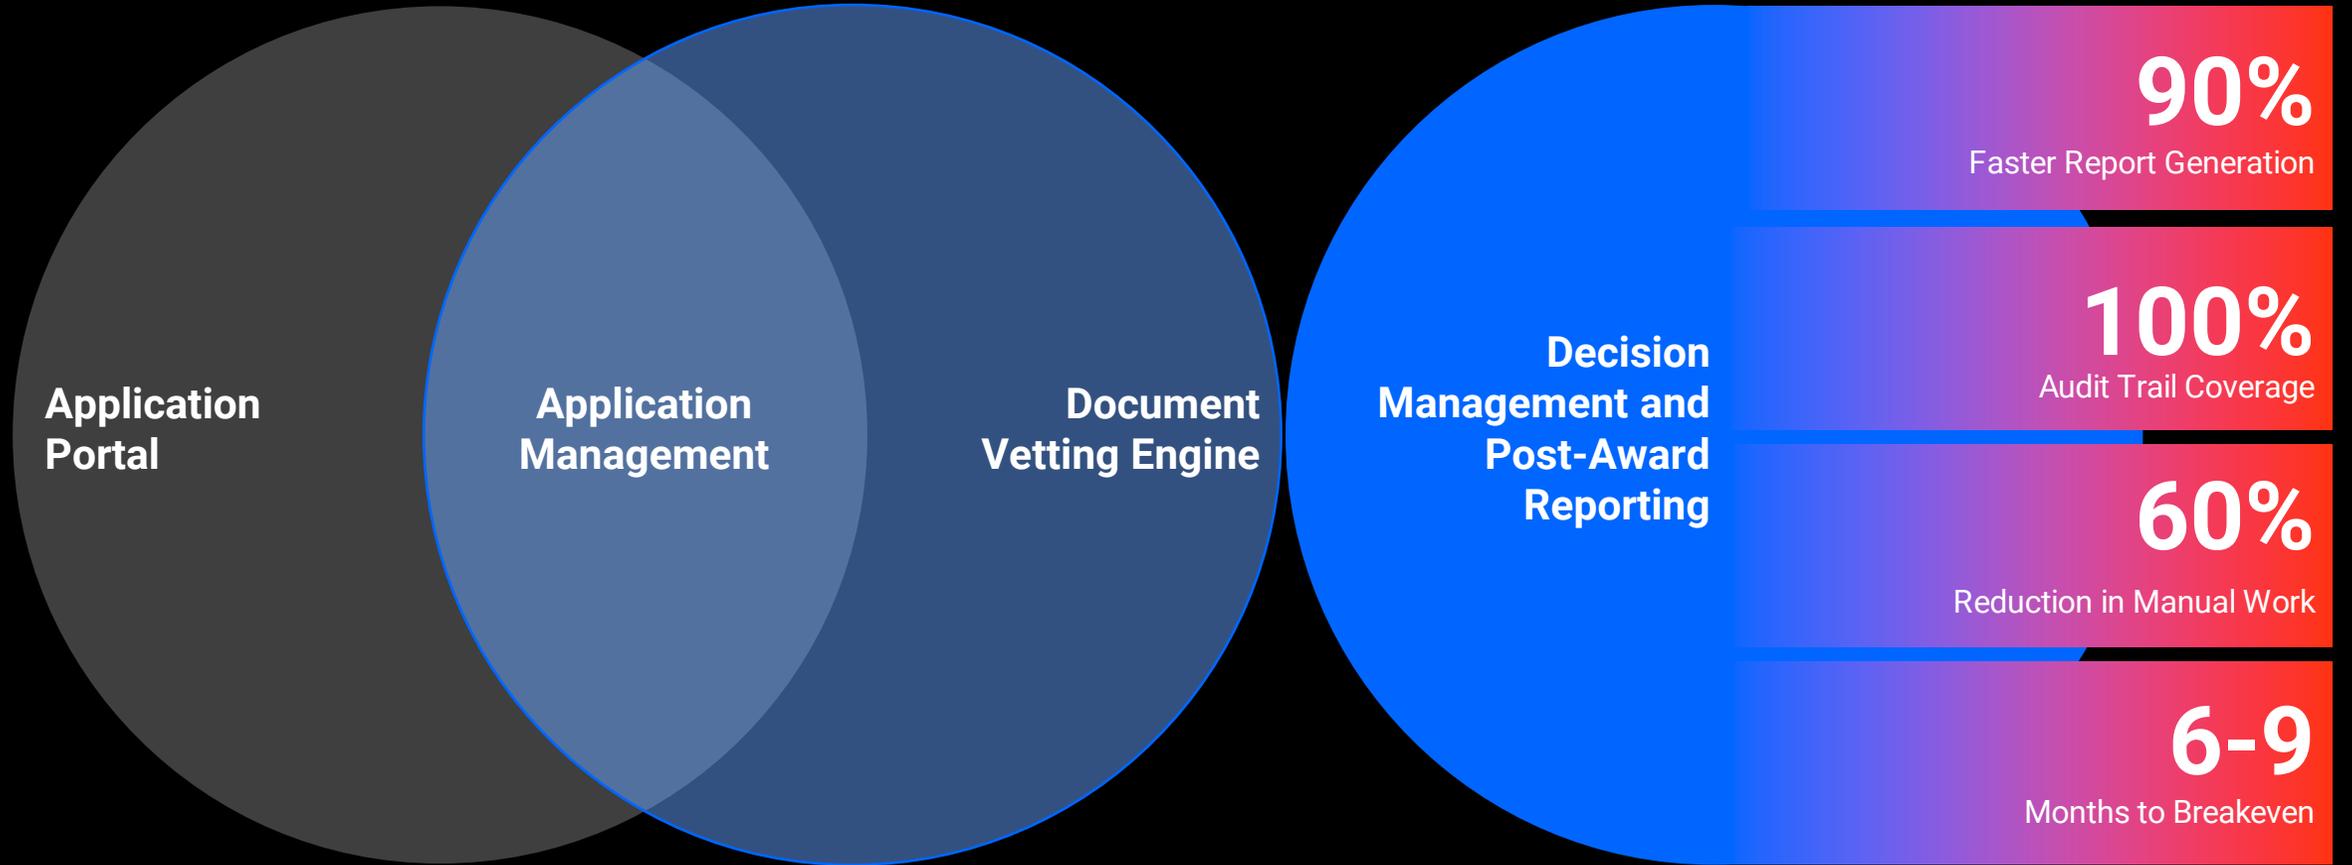

Wizpresso Adnoto delivers professional-grade application vetting capabilities that generic form builders simply cannot match.

How it Works

End-to-end solution to accelerate application workflows

AI that goes beyond search and chat

Accelerated Processing & Decision Velocity

Reduce application review time by 40-60% through AI-powered document verification, automated eligibility checks, and intelligent routing—enabling faster approvals and improved applicant experience.

End-to-End Case Orchestration

Complete application lifecycle management from intake to award with configurable workflows, real-time status tracking, multi-stage approvals, stakeholder collaboration, and comprehensive audit trails.

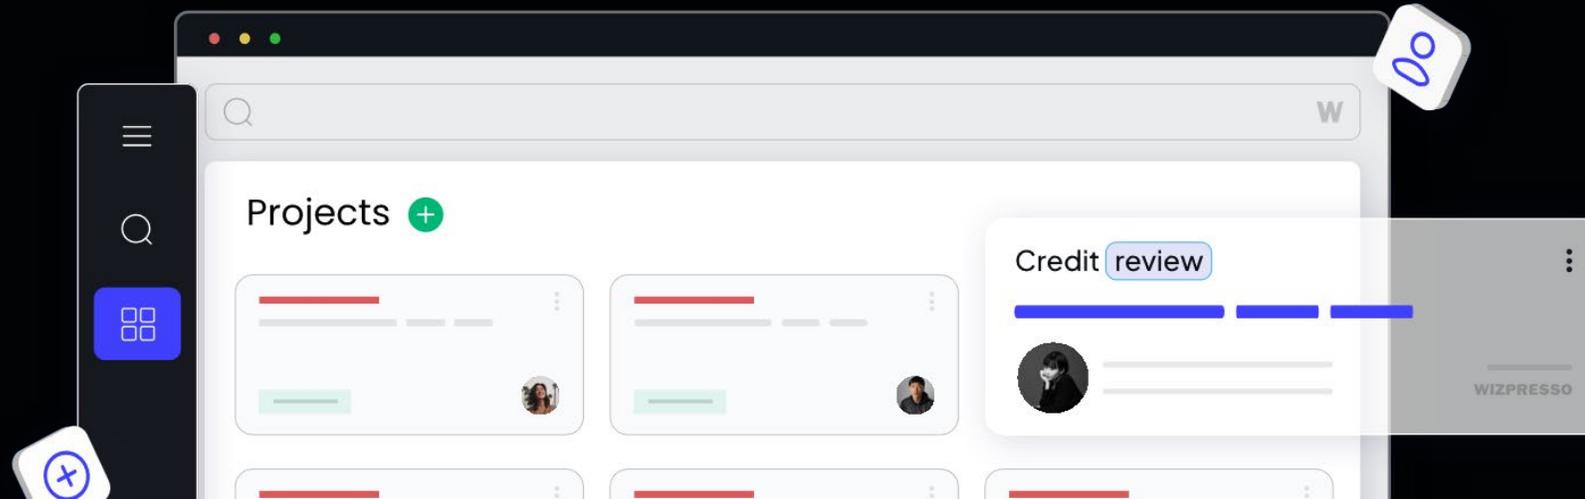

Risk Mitigation & Compliance Assurance

Strengthen governance through AI-driven compliance checks, verification, conflict-of-interest detection, role-based access control, and full regulatory audit readiness.

Data-Driven Intelligence & Insights

Transform application data into strategic insights with customizable dashboards, automated reporting, pipeline analytics, and performance benchmarking to drive continuous improvement.

Every team gets smarter with application management

Grants & Funding

Automate grant application intake, eligibility check, multi-stage reviews, and approval workflows with complete audit trails.

Human Resources

Streamline job application screening, assessments, and onboarding workflows with AI-powered vetting.

Procurement

Accelerate vendor application vetting, RFP evaluation, supplier due diligence, contract approval, and compliance processes.

Legal & Compliance

Enhance case management, regulatory submission reviews, compliance checks, and document verification with agentic AI.

Finance & Credit

Speed up transaction processing, credit reviews, risk assessment, KYC/AML checks, and approvals with intelligent automation.

Awards & Recognition

Simplify nomination intake, judging, scoring, ranking, conflict-of-interest management, and winner selection processes.

A government medical development fund accelerates funding applications with AI.

65%
Time savings

3x
Increased capacity

85%
Drop in error rates

Advanced permission control

Use Case

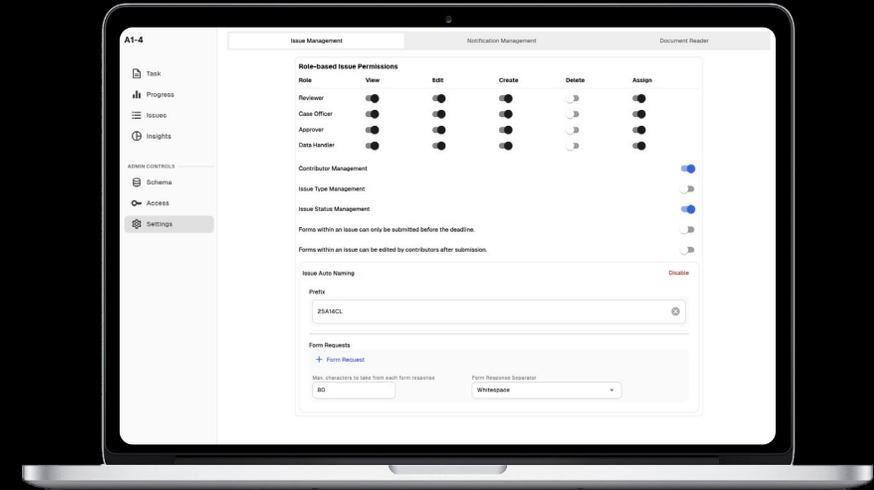

- A government-sponsored medical fund has a robust vetting process.
- Making sure applicants, including practitioners and research institutions, meet eligibility requirements

Challenge

- The fund admin must manually manage over 6,000 cases.
- Complex approval process involving multiple stages, types of applications, vetting officer roles, and declarations.
- Most applications are submitted offline or through a Word document.

Strategy

- Implemented a robust permission control by role, stage, type of forms, and declaration.
- Created a public URL for external parties to sign up and submit applications.
- Introduced parallel and sequential approval processes to enable application governance.

A large infrastructure provider automates job applications vetting with agentic AI

Time savings

AI-enabled CV Vetting

Use Case

- High-volume candidate screening for all mass recruitment initiatives
- Automated CV assessment and qualification against job requirements
- Multi-role concurrent hiring across different departments and shift patterns

Challenge

- HR receives thousands of applications for positions, requiring rapid assessment.
- Manual resume review and initial screening require significant HR staff time, delaying candidate progression.
- Peak hiring periods overwhelm existing recruitment capacity.

Strategy

- Deployed AI agents to automate initial resume parsing, eligibility screening, and candidate ranking.
- Aligned assessment criteria with existing hiring best practices.
- Incorporated domain-specific knowledge to properly score for different roles.

An internship funding scheme streamlined the reimbursement process with AI vetting agents

An administrator of a government-backed youth start-up internship programme reviews hundreds of applications and thousands of supporting documents each year to administer funding to companies and students.

65% Time savings

85% Drop in error rates

3x Faster applications

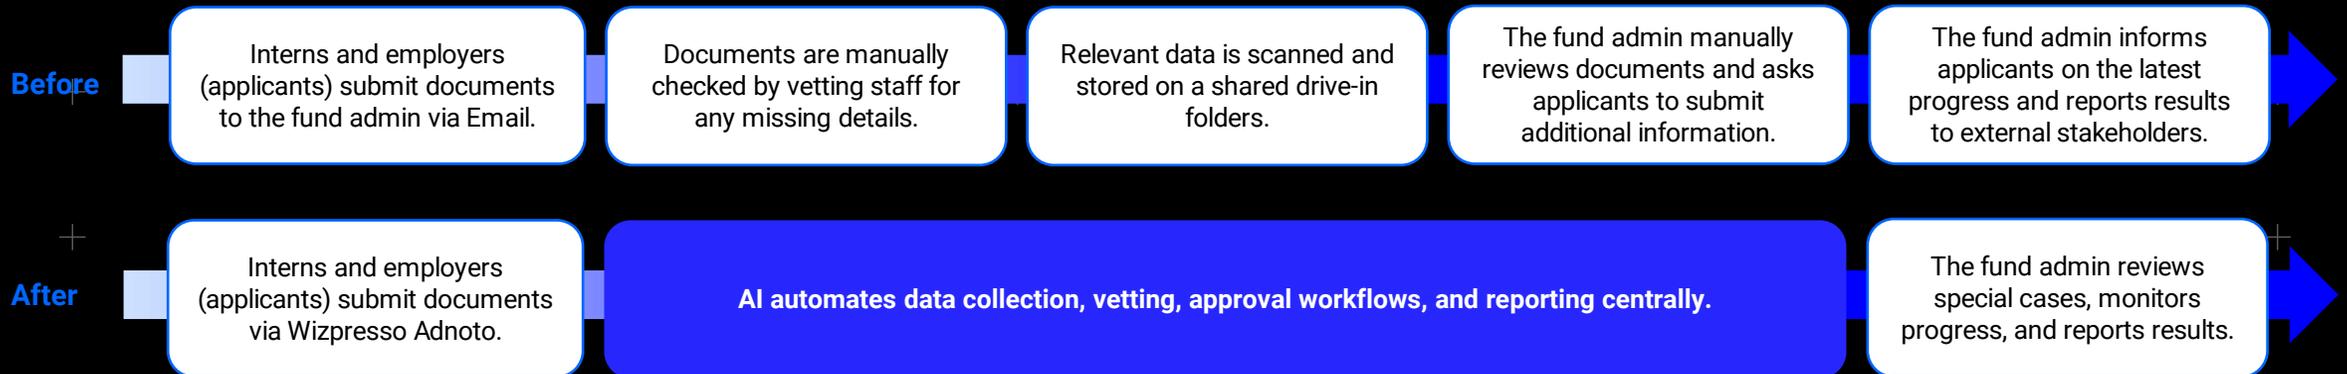

Challenge

- The fund admin manually reviews 1,000+ documents, including business registration documents, bank statements, employment contracts, and MPF contributions for due diligence.
- The team receives forms and documents in scanned images, Word, and PDF formats via email for over 100 applications, making it tedious to search, track, and review the information.

Strategy

- Built automated verification workflows to check and validate information from 5 types of scanned, unstructured documents.
- Developed an application management platform that enables all stakeholders to submit information and track progress centrally.
- Can search and export with the help of AI to easily retrieve the relevant information and generate reports.

Workflow

Driving AI ROI together

Organizations choose Wizpresso because we are product-led and partnership-driven.

- ✔ Dedicated success team, priority support, and SLA
- ✔ AI workflow consulting and integration guidance
- ✔ Tailored onboarding and change management support

Cybersecurity measures

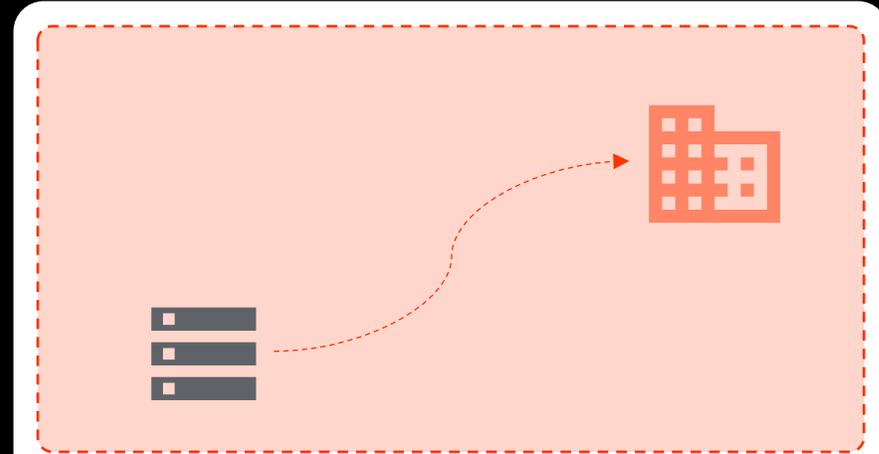

Wizpresso is ISO 27001: 2022 certified. Our security setup ensures the integrity of client data and access through industry standards and best-in-class security provisioning. The table below highlights our cybersecurity commitments for Adnoto (SaaS):

Security	Status	Description
Database encryption	✓	Data at rest is encrypted with the AES-256 standard
Data encryption in transit	✓	Data in transit is end-to-end encrypted with AES-256 standards. All connections use TLS/SSL encryption (version TLS 1.3)
Document encryption	✓	Document data is scanned and encrypted with the AES-256bit
Key management encryption	✓	Cryptographic keys encrypt data using FIPS 140-2 Level 3 certified cloud-based hardware security modules
Multi-factor authentication	✓	Identification management using phone-based or app-based OTP supported
Single sign-on	✓	Identification management integrated with Active Directory supported
Penetration testing	✓	Exhaustive annual test by 3 rd party with priority remediation of any security vulnerability issues
Application security testing	✓	Performed continuously on software with priority remediation of any security vulnerability issues
Vulnerability assessment	✓	Application and source codes are scanned before deployment and at least annually
Threat management	✓	Infrastructure is protected by threat detection services to monitor our servers against unauthorized behaviour
DDoS Protection	✓	Web application is protected by DDoS protection service 24/7 to safeguard against network and transport layer DDoS attacks
Firewall	✓	Firewall to protect our application or APIs against web exploits and bots that may impact availability, compromise security, or consume excessive resources.
Backup Protocol	✓	Comprehensive backup and recovery process to retain snapshots of data every 24 hours
RTO/RPO	✓	High availability zones to ensure RTO/RPO is in minutes

Deploy on Wizpresso Cloud

- ✓ Instant setup with no infrastructure management.
- ✓ Automatic updates.
- ✓ ISO27001:2022 Certified.
- ✓ 24/7 monitoring and enterprise-grade security.

Deploy On-Premise

- ✓ Complete control over infrastructure and data.
- ✓ Custom deployment.
- ✓ Enhanced security with your protocols.
- ✓ Dedicated support and implementation assistance.
