

# FACTIFY

## **Document Verification Solution 2.0**

Revolutionizing Verification – Experience a Leap in Speed, Accuracy, and Intelligence.

## The Hidden Drag Document Factcheck – Manual Verification

Manual verification can drain weeks from document publication and expose transactions to preventable risks.

### Costly Delays

Lengthy verification stalls transaction timelines, risking expensive market windows.

### Legal & Regulatory Exposure

Human error in disclosures can trigger fines, lawsuits, or failed approval.

### Reputation at Stake

Inadequate verification can damage client trust and long-term credibility.

## Smarter, Automated Document Verification Workflow

### 01. Annotate Document in Seconds

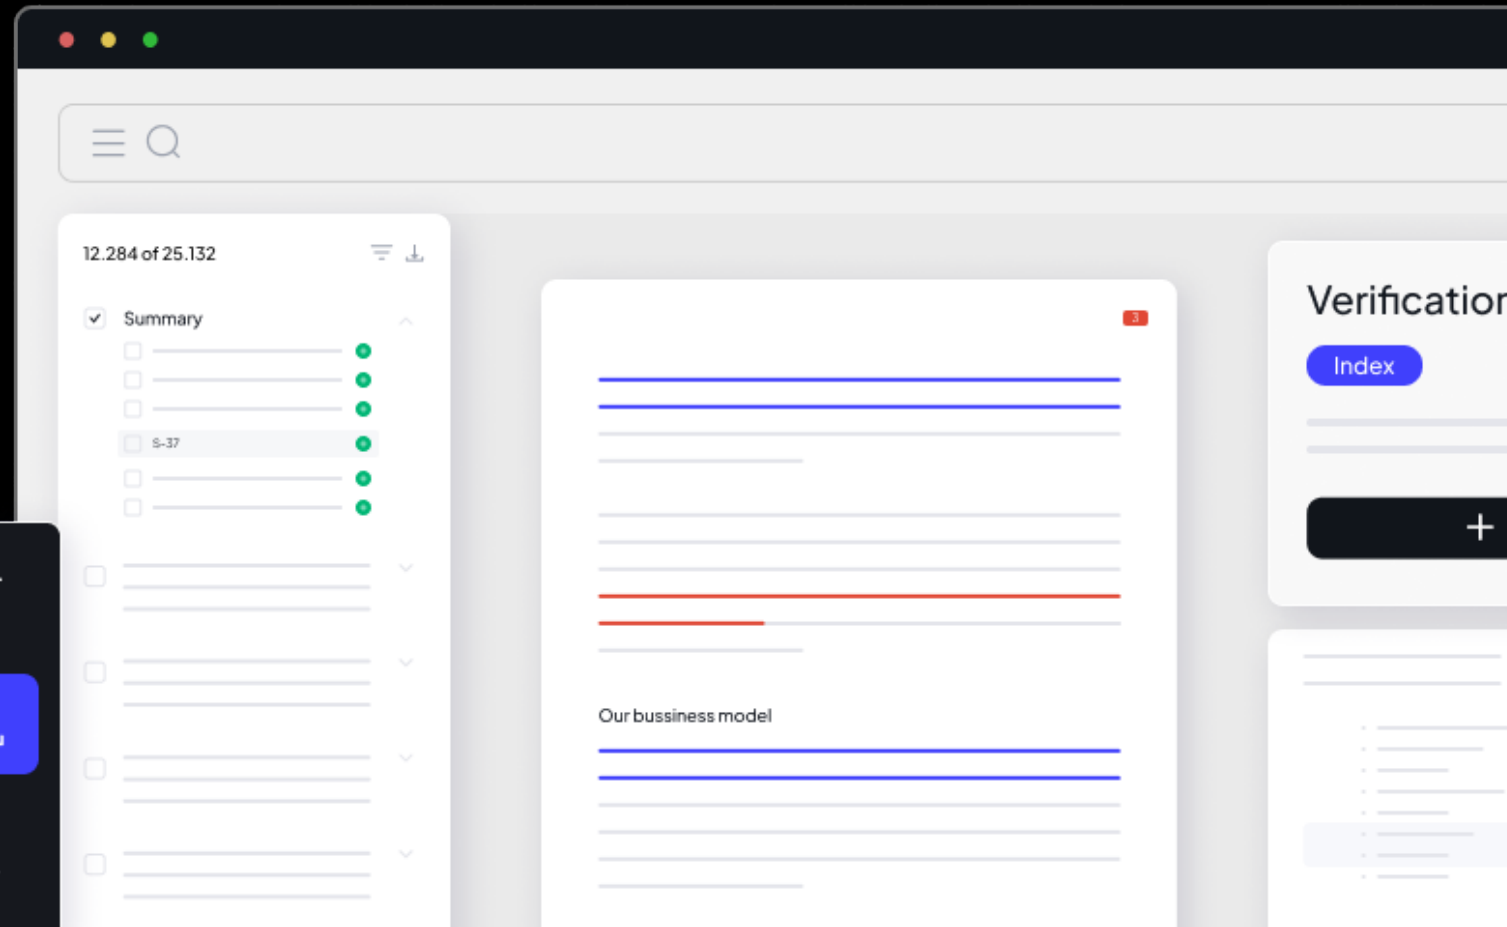

Instantly box up and group similar statements for efficient batch processing and reduced manual effort.

### 02. Generate Verification Notes

Automated verification, version change tracking, and seamless export of validated documents.

### 03. AI-Native Data Room

AI suggests needed supporting documents; collects and organizes client files within a secure data room.

## IPO Use Case – Maximum Speed, Security, and Assurance.

### 01. Prepare

Material statements are identified within the prospectus. Each statement is indexed and referenced with an ID.

45 man-hours → 10 minutes \*

### 02. Verify

Statements are classified as facts and opinions. Directors confirm opinions, while facts are verified using client documents.

165 man-hours → 50 man-hours \*

### 03. Organize

Supporting documents are collected and organized in folders and cited for verification.

40 man-hours → 8 man-hours \*

Scale over 10-20 document versions over the entire IPO

A1 Application

Q&A

Listing Committee Hearing

International Roadshow

Public Offering

\* Best estimates based on empirical records and user surveys.

## Features and Benefits

### Automatic Annotation

Instantly organizes material statements for rapid, error-free verification.

### Verification Generation

AI creates tailored verification notes and documentation requirements automatically.

### Version Tracking

Effortlessly monitor and transfer verification data across evolving document drafts.

### Compliance Monitoring

Integrated compliance checks and alerts ensure IPO readiness at every step.

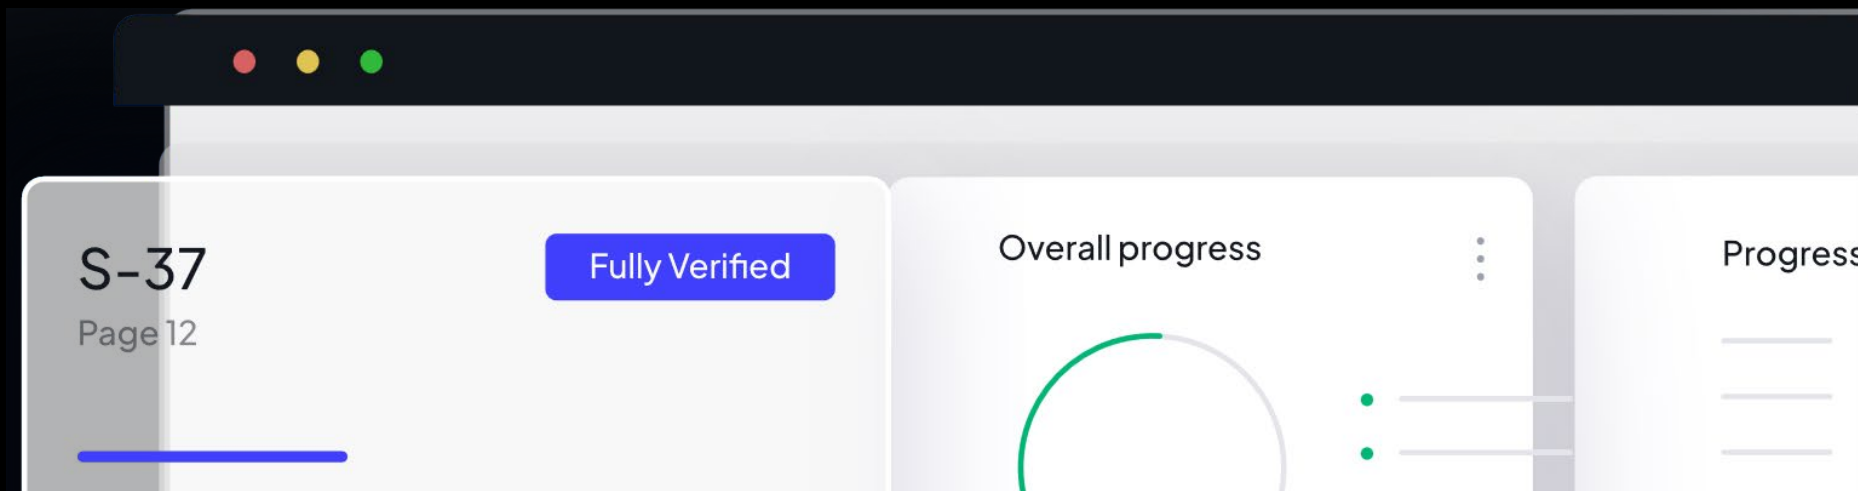

### Collaboration

Real-time, secure teamwork accelerates reviews and approvals.

### AI-powered Data Room

Centralizes, secures, and intelligently manages all deal documents.

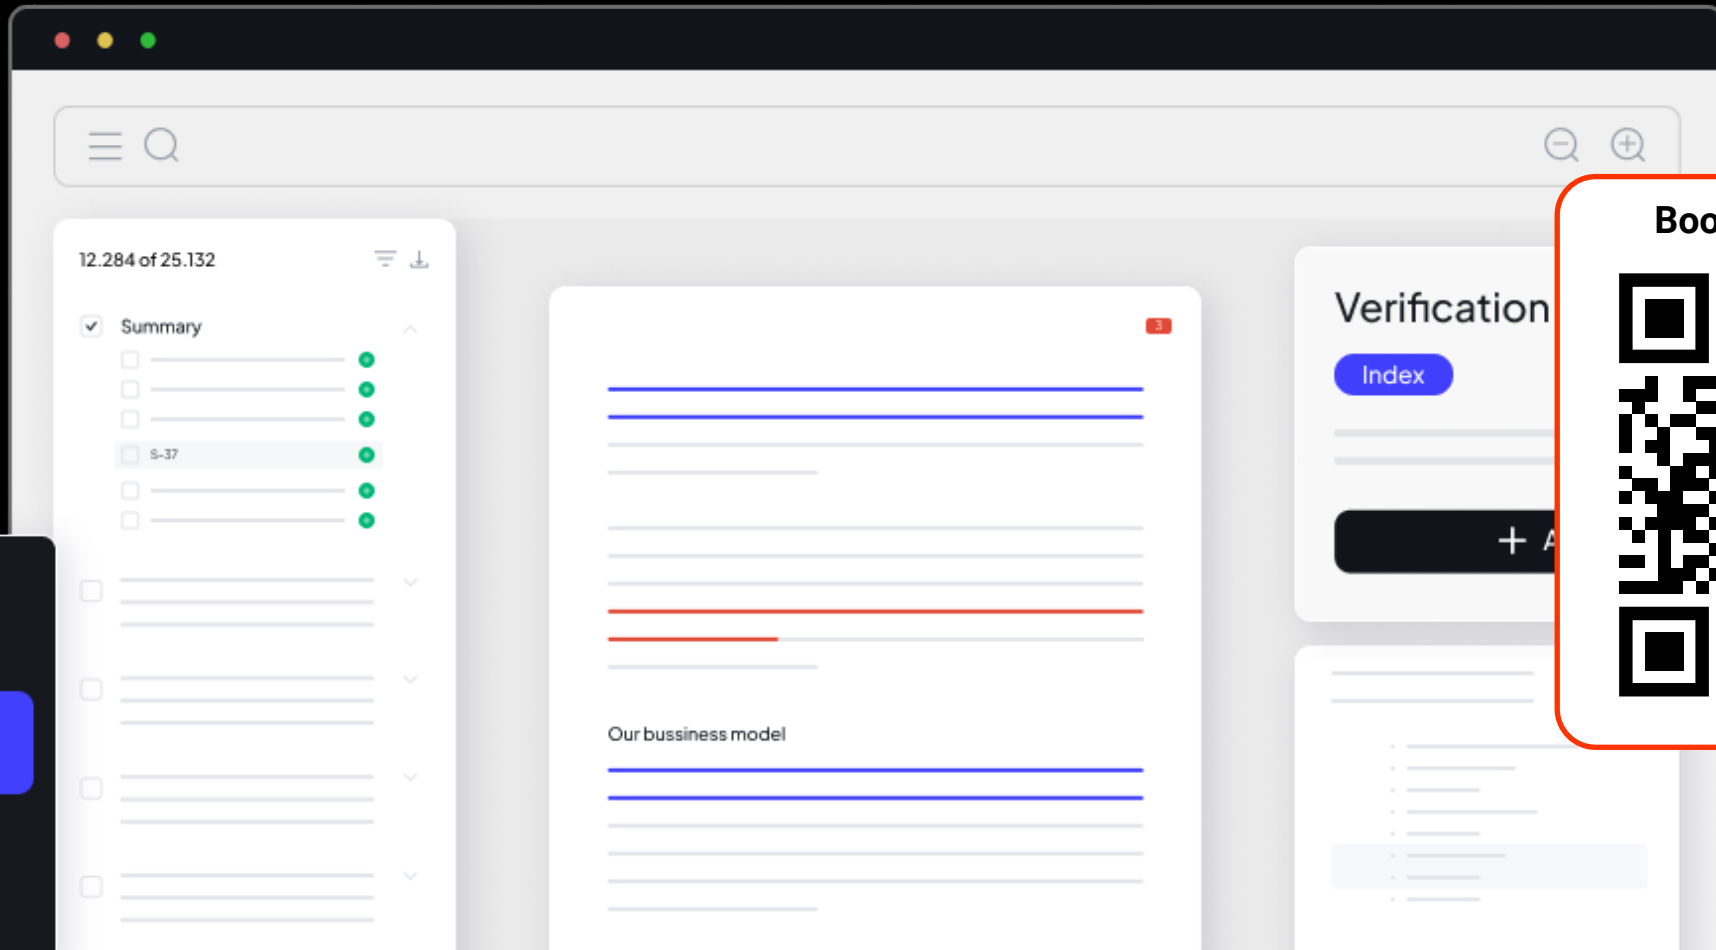

# Cybersecurity measures

Wizpresso is ISO27001: 2022 certified by an independent party. Our security setup ensures the integrity of client data and access through industry standards and best-in-class security provisioning. The table below highlights our cybersecurity commitments for Factify:

Security	Status	Description
Database encryption	✓	Data at rest is encrypted with the AES-256 standard
Data encryption in transit	✓	Data in transit is end-to-end encrypted with AES-256 standards. All connections use TLS/SSL encryption (version TLS 1.3)
Document encryption	✓	Document data is scanned and encrypted with the AES-256bit
Key management encryption	✓	Cryptographic keys encrypt data using FIPS 140-2 Level 3 certified cloud-based hardware security modules
Multi-factor authentication	✓	Identification management using phone-based or app-based OTP supported
Single sign-on	✓	Identification management integrated with Active Directory supported
Penetration testing	✓	Exhaustive annual test by 3 <sup>rd</sup> party with priority remediation of any security vulnerability issues
Application security testing	✓	Performed continuously on software with priority remediation of any security vulnerability issues
Vulnerability assessment	✓	Application and source codes are scanned before deployment and at least annually
Threat management	✓	Infrastructure is protected by threat detection services to monitor our servers against unauthorized behaviour
DDoS Protection	✓	Web application is protected by DDoS protection service 24/7 to safeguard against network and transport layer DDoS attacks
Firewall	✓	Firewall to protect our application or APIs against web exploits and bots that may impact availability, compromise security, or consume excessive resources.
Backup Protocol	✓	Comprehensive backup and recovery process to retain snapshots of data every 24 hours
RTO/RPO	✓	High availability zones to ensure RTO/RPO is in minutes
