

AI Agents for Public Sector

Wizpresso delivers domain-specific AI models to augment regulatory monitoring, compliance, and governance workflows.

Wizpresso’s AI Agents Solve Compliance at Scale.

Domain-specific AI agents automate governance, risk, and compliance (GRC) processes with precision and speed.

Adopted by regulators and the public sector.

Public Sector Regulators

- Enabling regulatory monitoring for regulators.
- Completed FSS3.1 sandbox, six POC schemes.

Financial Services and the Treasury Bureau
The Government of the Hong Kong Special Administrative Region of the People's Republic of China

Digital Policy Office
The Government of the Hong Kong Special Administrative Region of the People's Republic of China

Industry Associations

- AI-powered CG & ESG scoring for HK-listed companies.
- Innovation and data-related awards assessment.

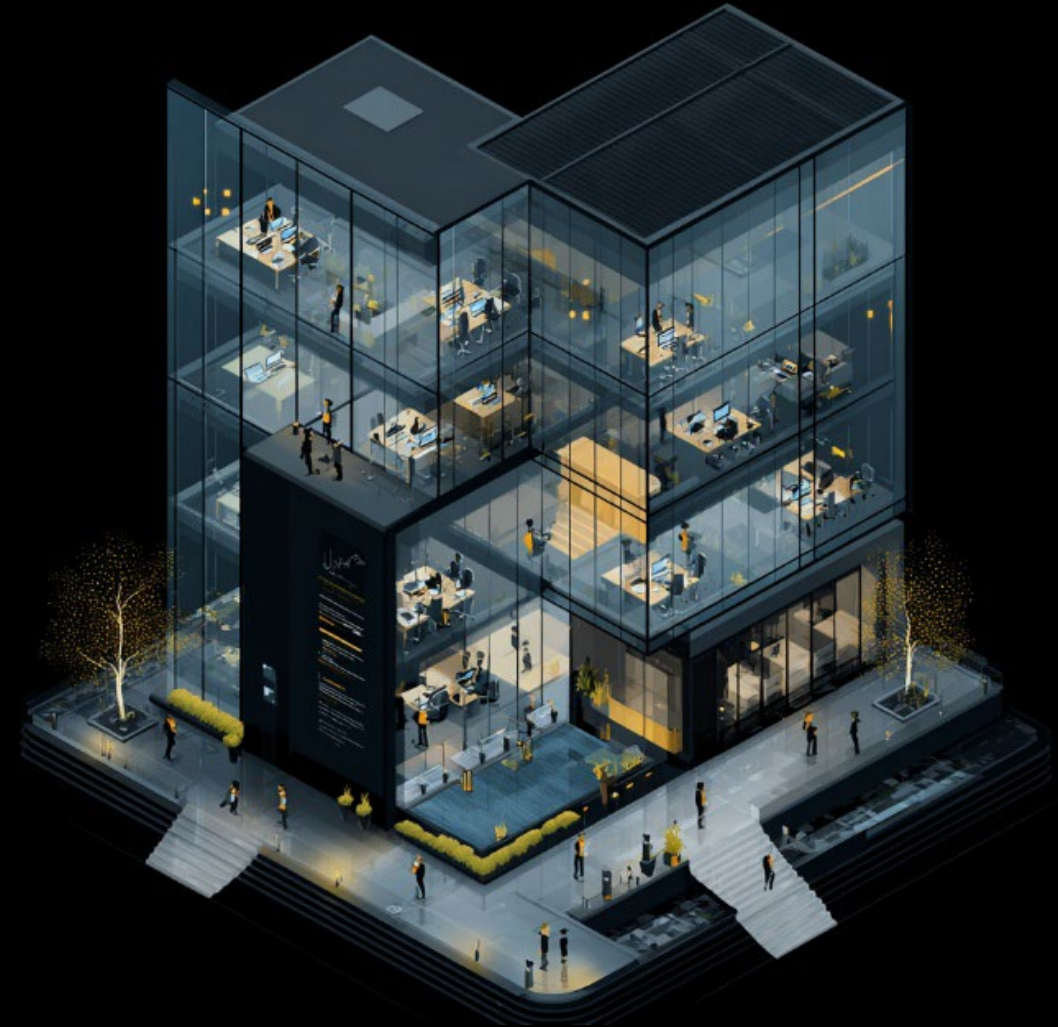

Infrastructure Providers

- Partnership with key cloud service providers.
- Multi-model approach for AI agents.

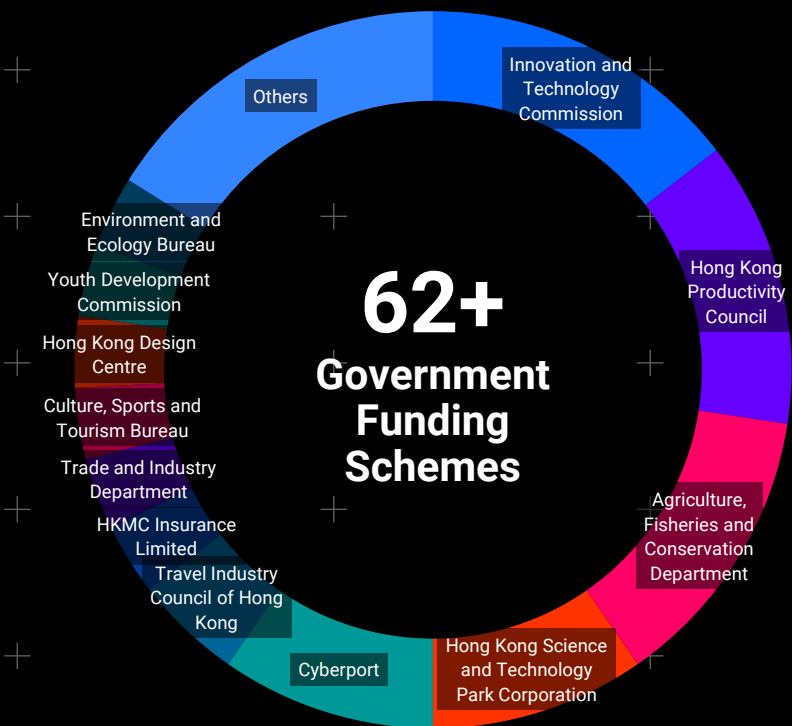

Use Case

AI-powered Application Management and Vetting

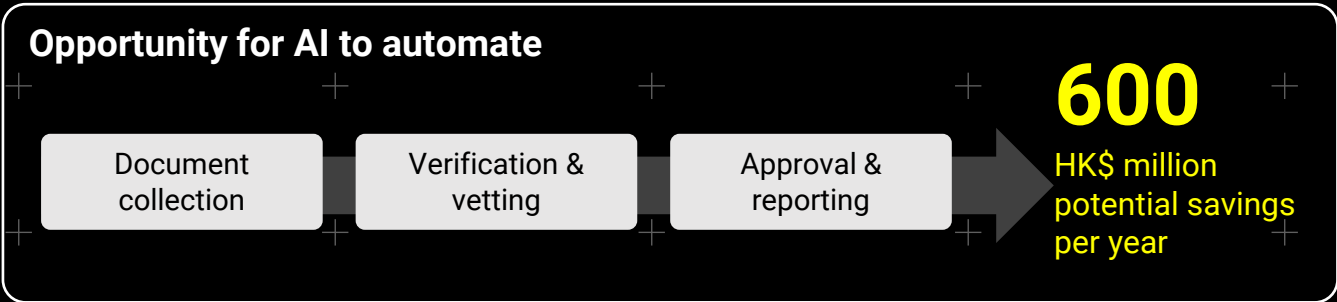

Funding application vetting is manual and time-consuming

HKSARG provides up to HK\$ 25 billion of public funding each year

Vetting and reporting costs the government an estimated HK\$750 million per year. Common practices include:

Documentation Required	Eligibility Proofs
Business Registration	Proof of being SME
Financial Statements	Proof of being a non-profit organization
Specific Industry Licenses or Certifications	Proof of holding specific licenses
Activity Details or Reports	Proof of operating in a specific sector
Budget or Cost Estimates	
Personal Identification	Plans to Provide
Tax Records or Compliance Documents	Project Plan or Proposal
Intellectual Property Documentation	Budget or Cost Estimates
	Technology Adoption or Innovation Plans
	Market Expansion or Activity Plans

Cyberport automates funding application vetting for a HK\$500 million government grant programme

85%

Accuracy

3x

Faster vetting

75%

Time savings

Document vetting layout

Use Case

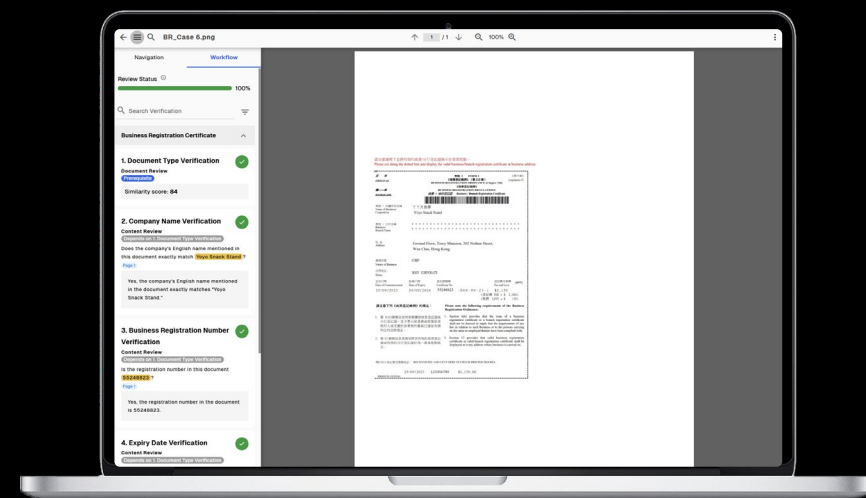

- Digital Transformation Support Pilot Programme (DTSP) application vetting
- Making sure SME applicants meet eligibility requirements

Challenge

- Cyberport must manually manage over 10,000 cases.
- Applications include more than 50,000 documents to be checked manually.
- Cyberport must regularly report the vetting progress for audit.

Strategy

- Trained AI automatically verify BR, CI, address proof and other docs.
- Streamlined application management, vetting officer assignment, and reporting
- Reduced vetting back-and-forth through auto-generated notifications.

Cyberport streamlined the reimbursement process with AI vetting agents

As an administrator of the Youth Start-up Internship Programme (YSIP), Cyberport reviews hundreds of applications and thousands of supporting documents each year to administer over US\$1 million to companies and students.

65%

Time savings

85%

Drop in error rates

3x

Faster applications

Challenge

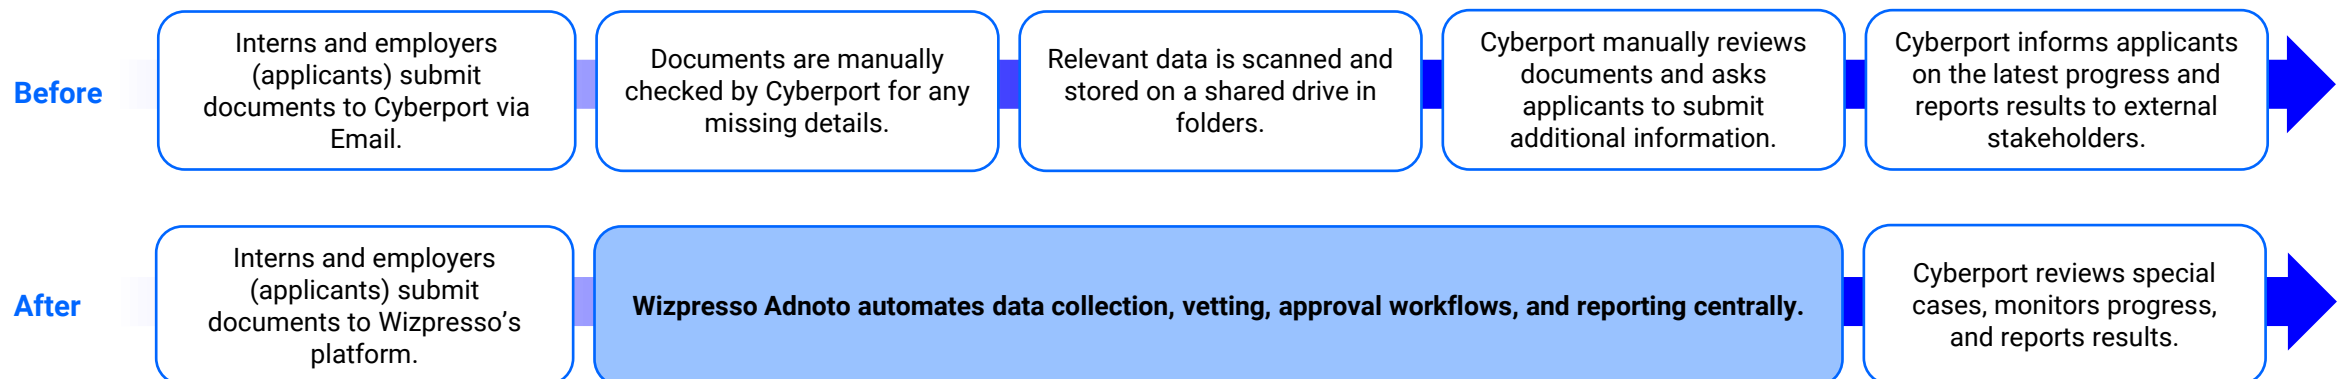

- Cyberport manually reviews 1,000+ documents, including business registration documents, bank statements, employment contracts, and MPF contributions for due diligence.
- The team receives forms and documents in scanned images, Word, and PDF formats via email for over 100 applications, making it tedious to search, track, and review the information.

Strategy

Through Wizpresso Adnoto, Cyberport

- Built automated verification workflows to check and validate information from 5 types of scanned, unstructured documents.
- Developed an application management platform that enables all stakeholders to submit information and track progress centrally.
- Can search and export with the help of AI to easily retrieve the relevant information and generate reports.

Workflow

HKPC ensures every funding applicant receives a fair, timely, and transparent review by using technology.

65%

Time savings

3x

Increased capacity

85%

Drop in error rates

Advanced permission control

Use Case

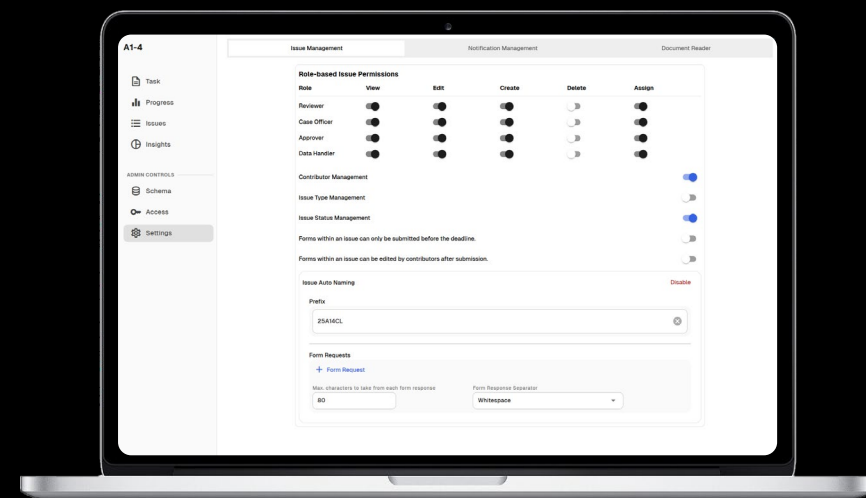

- Chinese Medicine Development Fund (CMDf) scheme A and scheme B vetting
- Making sure applicants, including practitioners and research institutions, meet eligibility requirements

Challenge

- HKPC must manually manage over 6,000 cases.
- Complex approval process involving multiple stages, types of applications, vetting officer roles, and declarations.
- Most applications are submitted offline or through a Word document.

Strategy

- Implemented a robust permission control by role, stage, type of forms, and declaration.
- Created a public URL for external parties to sign up and submit applications.
- Introduced parallel and sequential approval processes to enable application governance.

Our Technology supports leading organizations in application management.

HKICT Awards (FinTech)

Automates company eligibility checks and compliance document verification.

HKMA BARA

AI automates annual report reviews and supplies online tools for judges.

DALA Awards

Handles the end-to-end application and judging process, fully digital.

HKMA Sustainability Awards

Increase productivity in document review, verification, and transaction approval processes.

HKICPA CG and ESG Awards

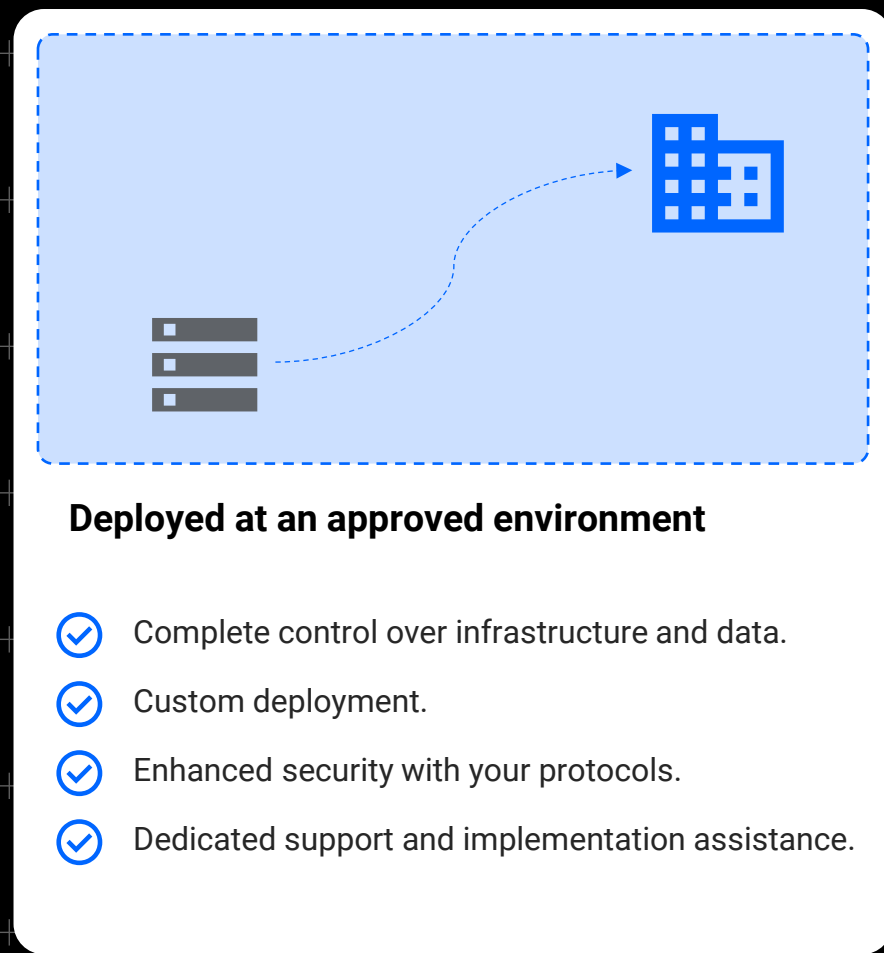

Scales vetting of 600+ listed companies against 50+ criteria—powered by AI.

AM730 ESG Awards

Automates the ESG report scoring process via a standardized AI framework.

+ AI vetting center to power and accelerate all funding applications +

AI-powered application and vetting

Cybersecurity measures

Wizpresso is ISO27001: 2022 certified by an independent party. Our security setup ensures the integrity of client data and access through industry standards and best-in-class security provisioning. The table below highlights our cybersecurity commitments for Factify:

Security	Status	Description
Database encryption	✓	Data at rest is encrypted with the AES-256 standard
Data encryption in transit	✓	Data in transit is end-to-end encrypted with AES-256 standards. All connections use TLS/SSL encryption (version TLS 1.3)
Document encryption	✓	Document data is scanned and encrypted with the AES-256bit
Key management encryption	✓	Cryptographic keys encrypt data using FIPS 140-2 Level 3 certified cloud-based hardware security modules
Multi-factor authentication	✓	Identification management using phone-based or app-based OTP supported
Single sign-on	✓	Identification management integrated with Active Directory supported
Penetration testing	✓	Exhaustive annual test by 3 rd party with priority remediation of any security vulnerability issues
Application security testing	✓	Performed continuously on software with priority remediation of any security vulnerability issues
Vulnerability assessment	✓	Application and source codes are scanned before deployment and at least annually
Threat management	✓	Infrastructure is protected by threat detection services to monitor our servers against unauthorized behaviour
DDoS Protection	✓	Web application is protected by DDoS protection service 24/7 to safeguard against network and transport layer DDoS attacks
Firewall	✓	Firewall to protect our application or APIs against web exploits and bots that may impact availability, compromise security, or consume excessive resources.
Backup Protocol	✓	Comprehensive backup and recovery process to retain snapshots of data every 24 hours
RTO/RPO	✓	High availability zones to ensure RTO/RPO is in minutes
