

This video is introducing “Leading Towards Robotics Technologies” Innovation Competition:

The Office of the Government Chief Information Officer (OGCIO) organised the Catch the Innovation Campaign (the Campaign), themed on “Leading Towards Robotics Technologies”.

2nd Runner up Awards:

Setting up Unmanned Aircraft System (UAS) for Fire and Emergency Services proposed by representatives of FSD

It is proposed to set up UAS including drones with accessories, live-video streaming system and back-end image processing hardware and software as a total solution for improving the fire and emergency operational efficiency and public safety, especially with regard to high angle rescue and mountain rescue incidents.
